---

Dedicated and accomplished Developer with total experience of 5+ years, hands-on experience into designing, developing, and implementing integration solutions. Adept at leveraging the full suite of Dell Boomi tools to streamline business processes, enhance data connectivity, and drive digital transformation. Seeking a challenging role to contribute my expertise in Dell Boomi development, integration architecture, and data management to propel organizational efficiency and innovation.

## PROFILE SUMMARY

- Extensive experience in developing and enhancing complex interfaces, deploying Boomi interfaces, and creating project documents (HLD, LLD, mapping).
- Proven track record in developing scalable integrations with Dell Boomi AtomSphere, covering Cloud Integration, Application Integration, and Enterprise web services APIs.
- Solid understanding and hands-on experience with various connectors, such as Salesforce, NetSuite, SuccessFactors, SAP, Workfront, Route planner, SFTP, and databases like PostgreSQL, Redshift, and MS SQL.
- Certified Dell Boomi Developer with expertise in Boomi MDH and flow implementation and administration. Proficient in mapping, creating, and transforming data schemas for different systems.
- Skilled in administering the Dell Boomi Integration platform, managing, monitoring, sustaining, and troubleshooting existing EAI integrations. Active participation in project design, build, testing, and deployment phases.
- Demonstrated ability to lead teams, participate in design and architecture discussions, and engage with clients on various topics. Experienced in providing ongoing production support to clients.

## SKILLS

- **Programming Languages:** Boomi, Groovy, Java, SQL, XML, JSON.
- **Integration Platforms:** Dell Boomi AtomSphere.
- **Connectors:** Salesforce, SFTP, SFTP V2, HTTP, Atom Queue, Database, Email, WSS, JMS, FTP.
- **Certifications:** Associate Developer level and Professional Developer level.
- **Tools:** REST, SOAP, XML, JSON, Flat Files.
- **Methodologies:** Agile (Scrum), SDLC.
- **Others tools:** Microsoft Azure, DevOps Practices

## EDUCATION

- Bachelors of Technology–Electronics and Communication Engineering–2019 at SR University, Warangal.
- Winner of Abhivyaktha conducted at SRIX incubator for “Women Harassment Safety Device using IOT”
- Runner-up of Cisco Hackathon, 2018 for “Women Harassment Safety Device Using IOT”
- Winner at IUCEE event named as SCALE (Idea based on Smart Bin).
- Part of five weeks Product Innovation Lab based on IOT.
- Coursework in Internet of Things.

## ACHIEVEMENTS/CERTIFICATIONS

- Participated in 5th Mental Calculation World Cup, 2012 in Germany (Youngest person among selected 40 members in the world).
- Record Holder from INDIA BOOK OF RECORDS.
- Record Holder from ASIA BOOK OF RECORDS.
- WINNER at MATH GENIUS AWARDS, 15.
- WORLD RECORD HOLDER in 21 Digits Square Event.
- AZ-900 Certification.
- Certified Data Virtualization Architect in Denodo.

- Certified in Microsoft Technology Association (Fundamentals on JavaScript).
- Certified Salesforce Platform Developer I.
- Certified Azure Data Scientist (DP-100).

## WORK EXPERIENCE

- Systems Engineer at Tata Consultancy Services, Hyderabad from March, 2022 to till date.
- Project Engineer at Wipro Technologies, Hyderabad from June, 2019 to March, 2022.

## PROFESSIONAL EXPERIENCE

- **Systems Engineer at Tata Consultancy Services**

### Project/Client – ATLAS AIR

Atlas Air, Inc. is a major American cargo airline, passenger charter airline, and aircraft lessor based in Purchase, New York. It is a wholly owned subsidiary of Atlas Air Worldwide Holdings.

- Build the process which includes Database, JMS, HTTP, Email Connector.
- Involved in creating Document Cache, Map Functions like String, Numeric, Custom Scripting using JavaScript.
- Designed Boomi processes.
- Worked on different shapes like Map, Add to Cache, Business Rule, Decision, Route, Branch, Data Process.
- Configured Set Properties, Data Process, Business Rule, Mail Connector, Execution of Process, deploying the process.
- Preparing the LLD, HLD and Unit Test Documents.

### Project/Client – RIVUS FLEET SOLUTIONS

MIS is integral to Fleet as it is the reporting tool for all vehicles and other relevant data for BT/Non BT customers. It holds data related to accident management, technician details, jobs/maintenance requests for vehicles and their associated dates. MIS basically comprises of 2 components – ODI jobs to extract data from external sources and OBIEE reports to display data to users.

Type of users (External customer or Internal users). Details of different interfaces

1. Source system: MIS has dependency on the source systems (WILLOW) for building the data. There are instances where MIS gets flat files from external sources like incident data from AA, driver data from PeopleSoft.
2. Destination: Rivus Fleet, BT, Openreach users along with External customers like Close Brothers, AA, EON, St John's Ambulance etc.
3. Protocols used: SFTP, JDBC.
  - Involved in developing Integration process as per requirement using different Connections, Logical Steps, and Message Steps.
  - Made use of (SOAP, REST) Web Services & API Management with different profiles XML, JSON, DB, FF.
  - Designed Boomi processes where quality and performance were of utmost importance, fixed defects, Supported projects during different phases of the project.
  - Created flow diagram and associated system process models to aid in clarity.
  - Worked closely with all the team members to ensure information and integration requirements are clearly understood and resolve any conflicts.
  - Acquired environment configuration details (database, host and port credentials) from source and target.
  - Made Consistent communication to all team members (functional analysts, developer, testing team and support group) where needed to ensure requirements are understood.
  - Developed a clear understanding of the integration and migration strategy for the project.
  - Performed impact analysis if request is dependent upon existing interfaces.
  - Created technical design document, unit test cases and other documents as well as part of production deployment.
  - Optimized the code in each phase of the integration development, prepared low level design document and performed code review as per standards.

- **Project Engineer at Wipro Technologies.**

**Project/Client: Microfocus International**

- Actively gathered all the business and functional requirements from source and target SMEs.
- Made multiple transformations between source and target profiles as per business requirements using in-built and user defined functions in map.
- Supported testing and business users during different phases of project.
- Connectors Used: Salesforce, NetSuite, NetSuite Openair, Database, SFTP, FTP and Mail.
- Worked on BI Integrations.

**Project/Client: Novartis**

Novartis is a Swiss multinational pharmaceutical company based in Basel, Switzerland. It is one of the largest pharmaceutical companies in the world. It discovers and develop innovative medicines and collaborates with others to help address some of the world's greatest health challenges.

- Analyzing the technical requirements of the project.
- Analyzing the data of the hospital records.
- Involved in identifying test scenarios and writing test cases, preparing, Reviewing and Executing Test Cases.
