EXPERIENCE SUMMARY

PROJECT PROFILE 1 – Tiffany and Co, USA

PROJECT DESCRIPTION

Client has recently upgraded to PeopleSoft 9.10 HRMS. They are having PeopleSoft HRMS modules like CoreHR, Payroll and Benefits. We have done and performed technical and functional tasks as a part of this project working mostly in SQR, Application Designer, Application Engine and People codes. Recently client planned to shift from Oracle PSFT to Oracle Cloud. So, lot of entities mapping work was also performed using SQL queries in Application Engine as well.

CLIENT DESCRIPTION

Tiffany and Co is an American luxury jewelry and specialty retailer headquartered in New York City. It sells jewelry, diamond jewels, stationary, fragrances, water bottles, watches, personal accessories to name a few. It markets itself as an arbiter of taste and style. These goods are sold at Tiffany stores and through direct-mail and corporate merchandising.

ROLES AND RESPONSIBILITIES IN THE PROJECT

- Performed the development work and implemented the changes requested by the client.
- Worked on technical documentation related to various enhancements and incidents solutions.
- Prepared monthly and quarterly reports as requested by the client for incident resolutions.
- Worked on solving the daily incidents through self service portal.
