EXPERIENCE IN VCONNECTSYSTEMS (1 January 2019 to till Date)

FRONT-END DEVELOPER (ANGULAR)

Oct 2020 – Present | Australia Domain

- (Innovation for Construction)
 - Planned front-end development using JavaScript, HTML and CSS using Angular.
 - Designed the front-end in it and made API calls, and along with this I have done api testing and application manual testing.
 - This has been designed which is good for optimization on every screen size.
 - Wrote the document of application test cases and api test cases also for screen responsive test cases.

BACK-END DEVELOPER (LARAVEL)

August 2020 – August 2022 | Australia Domain

- (Innovation for Construction)
 - Planned back-end development using PHP, Docker, MySQL, HTML and CSS using Laravel.
 - Designed the back-end in it and made API calls, and along with this I have done api testing using Postman & Newman.
 - Wrote the document of application test cases and api test cases.

E-COMMERCE WEBSITE (WORDPRESS)

January 2020– August 2020 | Australia Domain

- Product delivery
 - Designed E-commerce website in which we can login, logout and reset password.
 - In this, we can also order the products and pay for the product online or cash on delivery.
 - Created a separate page for particular customer, which is visible only when they login and some different options for payment were also given.
 - Use some plugins for make website better and also this is screen responsive website.

WEBSITE DESIGN (WORDPRESS)

January 2019 – January 2020 | Australia Domain

- Provided front-end website development using WordPress, Elementor editing software.
- Built and styled new mobile-friendly websites, transitioning legacy presentations to simultaneous easy-to-use versions.
- Employed search engine optimization tactics to increase reach of targeted audience.
- Make all websites screen responsive for better experience in every device. And used plugin as per client websites requirements.
