- CSS
- Postman Ext

Project Details

Project 1 || E Smart Banker

Role || Software engineer

Description: ESmartBanker is a full web-based and centralized banking system that covers all bank services. It enables multi-currency transactions and all delivery channels. The product was created utilizing open, industry standard, and time-tested technologies, as well as high-quality software engineering techniques. ESmartBanker is highly parameterized to accommodate continually changing client and regulatory need .

Roles & responsibilities:

- Full Stack development of React web application using Redux, ES6, MongoDB, Express and Node JS
- Developed responsive, accessible and reusable react components
- Developed UI on React JS supported with few libraries like Material UI, React-router dom etc.
- Developed e-transfer and account summary modules
- Developed RESTful APIs using Express and microservices architecture
- Established connection with MongoDB using mongoose
- Backend: CRUD API development - GET POST API development
- Mongo DB: Develop the Databases and Collection
- Developed functionality to map data and push it to back and retrieve data as per requirement using.
- specific wrappers. Pushing and pulling code to GitHub repo .

Project 2 || Vehicle Tracking

Role || Software engineer

Description: The major goal is to provide fleet maintenance and tracking services using real time data. Geofencing, over speeding and excessive idling notifications, vehicle health (engine overheating, low battery), and more services are available. Daimler plans to develop a shared marketplace for Fleet Owners and Load Owners, where load owners may post loads at any time and fleet owners can bid, receive confirmation, and begin transit.

Roles & responsibilities:

- Full Stack development of React web application using Redux, ES6, MongoDB, Express and Node JS
- Developed responsive, accessible and reusable react components
- Developed UI on React JS supported with few libraries like Material UI, React-router dom etc
- Developed e-transfer and account summary modules
- Developed RESTful APIs using Express and microservices architecture
- Established connection with MongoDB using mongoose
- Backend: CRUD API development - GET POST API development
- Mongo DB: Develop the Databases and Collection
- Developed functionality to map data and push it to back and retrieve data as per requirement using specific wrappers

Project 3 || Shopee Cart

Role || Software engineer

Description: it is an E-commerce website

Roles & responsibilities:

- UI development by using React JS with React Hooks
- Managing application-level state by using Redux and Redux hooks – useDispatch, useSelector
- Responsive web design by using React Bootstrap, HTML5, CSS3
- Highly complex components designing by using React with minimum usage of third party NPM packages
- Pushing and pulling code to GitHub repo
- Design and develop static or dynamic components based on the requirements from product owner
