Summary

Senior Software Engineer with 9 years of extensive expertise in SharePoint, PowerApps Development, and .NET development within the framework of Agile methodologies. Presently serving as a distinguished Power Platform Developer at Capgemini India.

Key Consulting Competencies:

- Proficient in SharePoint Development, demonstrating mastery in C# coding through the Client-side object model, coupled with comprehensive exposure to SharePoint administration.
- Accomplished in crafting ASP.NET web applications tailored to specific business requirements.
- Proven track record of building impactful PowerApps canvas apps for discerning clients.
- Adept in utilizing the entire spectrum of Power Platform technologies and associated tools.

Business Experience:

- Seasoned professional with 6 years of comprehensive development experience in .NET, utilizing C# as the primary programming language through Visual Studio.
- Distinguished 4-year track record in the development of Client-side Object Model (CSOM) SharePoint apps, Power Apps, Power Automate, SharePoint Central Administration, and business dashboards via Web parts.
- Proven ability to meticulously prepare design documents, coupled with effective communication with domain experts to discern and comprehend business needs, ensuring seamless alignment with application objectives.

♠ Technical Lead

Capgemini

Sep 2022 - Present (2 years)
Project Name: NBC Universal
Skills: Power apps development, Power Automate development, SharePoint, SQL

Description: Presently engaged in a dynamic role within the Power Apps development team, spearheading the intricate creation of user input forms designed for seamless request submissions. Instrumental in implementing triggers to facilitate data loading into SharePoint data sources, subsequent data transmission to Snowflake downstream applications for further processing, and the initiation of email notifications post-submission. Proficiently incorporating Canvas apps integrated with SharePoint & SQL connectors and Power Automate.

Simultaneously serving as a Team Lead, responsible for conducting comprehensive code reviews for junior developers. This integral aspect ensures adherence to the development lifecycle and upholds coding standards within the team.

Senior Associate

Publicis Re:Sources

Mar 2022 - Sep 2022 (7 months)

Project Name: Publicis Groupe

Team: Application development

Skills: Power apps development, Power Automate development

Description: Contributed to the Power Apps development team, actively engaging with a diverse array of applications interconnected through SQL connectors, SharePoint applications, and other third-party platforms, facilitating seamless communication through JSON responses.
