PROJECTS

Loan Originating System :

Client : Zavron Finserv

Team size: 15

Duration : Nov 2019 - Present

Role: Salesforce Developer

Description:

Zavron Finserv is the leading Fintech lender to digital India. From financing the dynamic growth of the SMEs to offering innovative point-of-sale financing for consumers. We passionately serve our customers with cutting-edge financial products and strive to help them.

Service clous serves the customer of Zavron for any queries related to different business units like consumer durable loan , Home loan, car loan , personal loan , two-wheeler loan.

Key Features:

- Speed and Simplicity of availing credit.
- Speedy loan disbursement
- Overcome the Gap between finance and the end-user.
- Intelligent use of technology
- Less documentation
- Maximize online process.

I am working as a Developer and handling below responsibilities:

- Client interaction for requirement gathering.
- Requirement analysis and documentation.
- Hands on Business Implementation and Integrations.
- Created custom VF - pages to override standard functionality.
- Created triggers to handle duplicates.
- Created approval process and SOQL queries.
- Communication with other system via REST API.

TransPort portal:

Duration: Sept 2018 to Oct 2019

Team size: 12

Role: Developer

Description:

Transport Portal is web based application allow employees need for cabs emergency condition. Initially an employee raises request for cab to company HR. HR will check the pending requests by timely basis and provides the approval for valid requests otherwise rejects the request. Approved requests list will be sent to the Transport Desk to provide the service. Transport Desk will assign the driver to provide the service for employee requested.

Responsibilities:

- Involved in DAO Layer functionality.
- Bug fixing across module.
- Interacting with the On-Site for clarification of requirements and issues.
- Doing analysis for some defects and change request.

Home Construction and Service Management System:

Duration: Dec 2017 to Aug 2018

Team size: 7

Role: Developer

Description:

This Project gives the solution to build new home as well as home improvement problems. Using this project customer can easily select his requirements to construct a home. In this way customer can design his home which he want. Also customer can estimate the cost based on his requirements. Once he fill the details then the expert will call to that customer and they will provide the support to that customer to build a home within his estimated cost so that customer can satisfy.

Responsibilities:

- Bug fixing and enhancements across module.
- Interacting with the On-Site for clarification of requirements and issues.
- Doing analysis for some defects and change request.
