ACHIEVEMENTS: -

- Presentation given on IOT in PBR VITS Engineering College
- Conducted and participated in workshop on AI at NBKR Engineering College.
- Published a paper on Alcohol detection for car locking system in RSR Engineering college
- Attended Industrial training for 6 months in SPDC A.P. LTD

Academic Project Details:

Project Title : UNDER GROUND CABLE FAULT DETECTION

Team size : 5

Role : Lead

Description: Underground cables are prone to a wide variety of faults due to underground conditions, wear and tear, rodents etc. Also detecting fault source is difficult and entire line is to be dug in order to check entire line and fix faults. So here we propose an cable fault detection over IOT that detects the exact fault position over iot that makes repairing work very easy. The repairmen know exactly which part has fault and only that area is to be dug to detect the fault source. This saves a lot of time, money and efforts and also allows to service underground cables faster. We use IOT technology that allows the authorities to monitor and check faults over internet.
