Three years of Experience, Meticulous and Result Oriented Database Professional with Experience in Oracle Database, Scripting and ETL execution. Proficient in liaising with key stakeholders to optimize Database Design and develop complex business requirements. Knowledge in Payroll, HR & Finance domain projects and keep myself updating with latest tools and technologies

## WORK EXPERIENCE

### Senior Software Developer Damacloid Technologies

03/2021 - Present,

Mumbai, India

Project : ICICI Prudential AMC.

#### Key Responsibilities

- Import Data from different Sources into Oracle Database and Generate Reports by writing Complex SQL Queries using multiple Joins, Cursors, Loops, Subqueries, Set Operators and Export Data into Excel, CSV Format. Perform Monthly Activity like AUM, GSNS Computation, FIFO Execution, Scheme Difference Resolution, Database Replication
- Discuss Requirement from Users, Execute Adhoc Procedures and Batches as per Schedule using Citrix Scheduler and generate Automailers. Data migration to/from databases & MS Excel.

### System Engineer TATA Consultancy Services

11/2016 - 10/2019,

Mumbai, India

Project : TCS Internal Ultimix Payroll.

#### Key Responsibilities

- Write SQL, Dynamic SQL, PL/SQL Collections and Exception handling. Writing the Packages, Triggers, Functions and Stored Procedures. Design Database models and Showcase to Project Manager. Write Java Programs to Convert Complex XML Data to Various Other Readable formats like CSV using DOM, XSLT, XPath Operations. Create Progress Report and daily Status report in Confluence to keep track of Project activities.
- Writing Complex SQL Queries using multiple Joins, Subqueries, Set Operators and add them to Perl Scripts to fetch data from Oracle Database and execute the Scripts on Linux Terminal. Resolve performance tuning related issues and problems.
- Fine Tuned Informatica Mappings from Source to Target Destination. Used Transformations like Filter Aggregator, Sequence generator etc. Executed, Monitored and Tested workflow Mappings in ETL Informatica and Performed Data Validations.
- Debug Programs, Used Explain Plan, Oracle hints and creation of new indexes to improve the performance of SQL statements. Oracle database creation, table space management, creation of database links.
- Creating user stories and maintaining backlogs items for each Sprint Duration and Provide Effort Estimation for the assigned Task. Refer JIRA Board for Assigned Task and work on the same.
- Preparing various documents for the Code Changes. Verifying the Check list while doing the code fix, data fix, release activity to ensure quality of the changes. Developed Strategies for Extraction Transformation Loading (ETL) mechanism and Take Signoff/Approvals from Users.

## SKILLS

Oracle SQL PLSQL Java Etl Informatica

SVN CVS Shell Perl Unix/Linux

Jenkins Jira Confluence XML

Performance Tuning MS Office Citrix Scheduler

## SOFTWARE TOOLS USED

Oracle 11G, 12C ; Eclipse; Sql Developer, Plsql Developer; Informatica; TOAD; Perl 6 ; MS Office; Open Office; Teams; IBM Sametime; Outlook

## EDUCATION

Bachelor Of Engineering [EXTC]: 7.43 CGPA  
(08/2012 - 05/2016)

M.H. Saboo Siddik College of Engineering [Mumbai University]

HSC : 84.5 % (08/2010 - 02/2012)

M.H. Saboo Siddik Technical Junior College [Maharashtra State Board]

SSC : 81.45 % (03/2010)

S.T. Michael's High School [Maharashtra State Board]

## PERSONAL DETAILS

Date of Birth : 27-July-1994

Languages known : English,  
Hindi & Marathi

Notable Achievements :  
Qualified IEEE level 2  
robotics competition,  
Elementary Drawing  
competition

Gender : Male

## INTERESTS
