- Participation in Sprint planning and grooming process
- Participation in Test Planning process and developing Test Plan and Test Scenarios.
- Involvement in creating Integration, Regression and smoke suite
- Performing Functional, UI and API testing using Charles for mobile and web application by following Agile methodology
- Creation and execution of test cases in qtest. Reviewing test cases and generating report in qtest
- Logging bug details in JIRA, generating Bug Report and reporting details to development team
- Performing regression and smoke testing on QA, UAT and Production Env
- Performing Regression Testing and executing Automated Test Scenarios for ensuring the stability of the application before release for every enhancement or changes
- Execution of automated test cases using selenium and Appium
- Conducting defect triage meetings to get the status of defects.

Company Name	Epicomm Technologies
Tenure	April 2015 – April 2019
Client	Various
Testing Type	Web and mobile application testing (Android, IOS) with Manual and Automation
Testing Tools	<ul style="list-style-type: none">• Selenium - Webdriver with java• Data driven with POM design pattern and TestNG

Description

Project 1

SocialNightLife
SocialNightLife is an Event management and venue management application. Also, it is a social communication application. It helps the venues to manage their events. And also helps users to find events in their location and communicate socially.

Project 2**Live Well Homes**

The software application is for a construction company comprises of two applications; the administration application and the iPad application. The admin panel is a web-based application provided to the construction company for updating their home designs, floor plan. The iPad application has been developed for sales individuals from the construction company, so they are able to view a variety of designs, floor plans, elevations and details of homes added by the admin panel

Project 3**American Sleep Association**

American Sleep Association (ASA) has an FDA (Food & Drug Administration) approved oral appliance to reduce sleep apnea and is accredited by Medicare. It is a web-based application that would enable its customers to review information on the oral products, take sleep or no sleep tests and view other related facts

Project 4**YourBromley**

YourBromley is mobile application developed Bromley UK for android and IOS platform. Where user can see the car, parks pinpointed on map along with available parking spaces and other facilities and can start the navigation from his current location to car parks
