Project Details

Project #1: Payroll Revenue System (PRS)

- Organization   - Contact Point360 Pvt. Ltd.

- Team size   - 10

- Role   - Developer.

- Technology   - Python, Django, Numpy, Pandas, Matplotlib, DRF, MYSQL, HTML, CSS,

  Bootstrap, JavaScript, Mysql.

- Duration   - 6 Month

Payroll Revenue System (PRS): In This project we created individually login pages for operation manager, Supervisor and agents. Using of this project supervisor and operation manager can easily see the agents working time, login time, logout time, lunch break time etc. In this project we have created the function to operation manager for transfer the agents to other supervisor team.

Scope of work:

◦ Involved in back-end code for developed this application.

◦ Involved in database module.

Project #2: Enercare Tracker System (ETS)

- Organization   - Contact Point360 Pvt. Ltd.

- Team size   - 10

- Role   - Developer.

- Technology   - Python, Numpy, Pandas, MatplotLib Django ,DRF, MYSQL , HTML , CSS ,

  Bootstrap, JavaScript, Mysql.

- Duration   - 6 Month

Enercare Tracker System (ETS): In this project we created different types of cases like B36 cases, HPM cases, CC cases etc. once the new case created by agents after that supervisor will submit this case and it will be store in the database. In this case we can see the creation time, queue time, start date, site id etc. we have given the function of Error rate only for supervisor, he can only submit the data.

Scope of work:

◦ Involved in front-end design for developed this application.

◦ Involved in database module.

Project #1: AISA

- Organization   - OVI Hosting Pvt ltd.
- Team size   - 10
- Role   - Developer.
- Technology   - Python, Django, DRF, MYSQL , HTML , CSS , Bootstrap.
- Duration   - 2 year.

AISA (Artificial Intelligence Support Assistant). An AI project which is resolving the issue by using chatbot. The customer can enter the issue which is faced with his server by using the chatbot and the issue will resolved automatically, or else it will raise the ticket. It will resolve more than 80% of the issue.

Scope of work:

◦ Involved in Designing and Development of modules and Code review.

◦ Involved in Unit and Integration testing.

Project #2: OVI - Panel

- Organization   - OVI Hosting Pvt Ltd.
- Team size   - 11
- Role   - Developer.
- Technology   – Django ,Python,DRF, MYQL, HTML , CSS , Bootstrap
- Duration   - 2 years.

OVI - Panel The control panel which is same like cPanel to control all the server related applications like WHM(Web Hosting Manager) and the Control Panel like cPanel. Now we released the version as 4.7. This would be the free open source control panel.

Scope of work:

◦ Involved in Designing and Development of modules and Code review.

◦ Involved in Project Lead.

◦ Performed unit testing and Load testing of the application.

◦ Worked on the modules involving MySql, Cron Manager, and performed Migration.

Application Developer at Hewtech System Pvt. Ltd.

Project Title: Bihar Siksha, Shristi sewa foundation
