## Summary

Vinod is a Sr. Quality Assurance Engineer with more than 8 years of experience. He loves to find bugs in Software applications and help the companies to release the applications to market without any Critical or Major bugs. He is passionate about his job and willing to evolve with the latest technologies.

He has 3 plus years of experience in Automation Testing – Katalon Studio, Java-Selenium WebDriver, Playwright JS Automation, Postman API Automation, GIT with BitBucket, Jenkins and Product Analysis. Also have minimum work experience on Salesforce Sales, Service Cloud & CPQ, Dart & Flutter Mobile Automation framework and MongoDB.

He has tested many wide ranges of applications, such as Client-Server, Web, Mobile, Retail, Banking and CRM applications.

Vinod has a Bachelor's degree in Information & Science Engineering from VTU university. He resides in Bangalore with his family. He is an avid sports fan and enjoys playing Cricket, Volleyball, Carom, Table Tennis and spending time with his family.

Technologies: Functional and Automation Testing using Java Selenium

### **Senior Test Engineer**

DXC Technology

Mar 2018 - Apr 2019 (1 year 2 months)

I was working on Payroll of Lobo Staffing Solutions Pvt Ltd through Infogain India Pvt Ltd at HP ( DXC Technologies)

The aim of this project for our client Micro Focus is to integrate applications like Salesforce, Apttus, Zuora and NetSuite by using MuleSoft. I am part of the Salesforce team, where I need to test the data flow between Salesforce, Apttus and Zuora applications.

Apttus CPQ (Configure Price Quote) is part of a complete suite of enterprise-level, integrated, end-to-end applications that enable the entire Quote-to-Cash process including Contracts, Incentives, Billing and Order Management and E-Commerce. Built native on Salesforce, Apttus CPQ leverages machine learning for data-driven insights and intelligent recommendations

#### Responsibilities

1. Participated in Scrum meeting on daily basis.
2. Understand the Business Requirements and deriving Test Scenarios and Test Cases.
3. Performing Test Case Execution and raising defects in HP ALM and following up to defect closure.
4. Writing Automation Test Scripts using Core Java – Selenium
5. Executing SIT test cases in HP ALM and supporting UAT Testing.
