OBJECTIVE

To work in an organization where culture of freedom and working for initiatives is ensured, facilitating my contribution thoughts and action to the company's vision, therefore achieve self-development by a playing a significant role in building the organization.

EXPERIENCE

System Engineer @TCS (Salesforce Developer) **10June19-Continue**

Working in the Nokia project with 2+ years of experience on Salesforce-Lightning Platform. Responsible for Developing and maintaining The Nokia Case Service portal on Salesforce Service cloud that provides B2B & B2C business Services across the globe.

Project Intern @ ISRO (Software Engineer) **29 Dec18-1June 2019**

Worked as a Software Engineer in **NRSC ISRO** Hyderabad. Developed a **Network Load Balancer (IDEAL Software)** to process & distribute Satellite image traffic. Successfully delivered the project in 7 months from the Initial analysis stage to the first version of the product under guidance of my mentor. (Ref: - Sc. Naseer Jain, Sc. Sonu)

Project Intern @ Cyber-ops (Penetration Tester) **25 May17-16Aug 2017**

Got a 100% scholarship in the training program. Learn and Closely work with Cyber-Security expert of Rajasthan Cyber Cell.

COMPUTER PROFICIENCY (*Present working*)

Programming language: Apex || Python (*specialised*)

Working-Field: Salesforce-Lightning (Primary) (programmatic & declarative)
Blockchain-Tech (Enthusiast)

Platform & OS: Ubuntu, Kali Linux, Web-application (Aura), Meta-data, API.

PROJECT (*Past Participation*)

At JECRC University, I made several contributions in various projects such as configuring and incorporating a captcha to Moodle, an open source course management system, Ecell Website, COSEC Website, Mess food processing app, yoyo chat bot & pet tracking system.

I also made a Web-Crawler by using google page Ranking Algorithm & intelligent distribution of estimated data load (ideal) software for NLB.

All other open source contribution is available on GitHub:
