

Harshit Rajput

Dell Boomi Integration Developer

PROFESSIONAL SUMMARY

- Integration Development Professional with a proven track record in designing, implementing, and automating complex integration solutions.
- Proficient in delivering high-quality, scalable integration solutions that meet business requirements and drive operational efficiency.
- Adept at mapping and transforming data formats between systems to maintain compatibility and integrity of information exchange.
- Competent in implementing robust error handling mechanisms and logging frameworks to identify and resolve integration failures efficiently.
- Well-versed in XML, SOAP, JSON, and Web Services for seamless data exchange and integration between disparate systems, demonstrating proficiency in various data formats and communication protocols.
- Capable of designing and developing APIs (Application Programming Interfaces) for exposing services and functionalities, defining API contracts, endpoints, and documentation to enable seamless integration with external systems.
- Worked in FTP (File Transfer Protocol) for transferring files between servers, configuring and managing FTP connections to facilitate file-based integration between disparate systems.

WORK EXPERIENCE

System Engineer

May 2021 - Present

Tata Consultancy Services Ltd.

- Played a pivotal role in projects including Santos IDM to CTM integration for Santos Ltd, EDI Implementation for Constellation Ltd, and OneMDS Integration for Exelon Corporation.
- Constructed and automated intricate integration workflows to facilitate seamless data transmission across diverse systems, resulting in a 30% reduction in integration time.
- Spearheaded the implementation of robust event-driven processes, leveraging topics, queues, and subscriptions, leading to a 40% improvement in system responsiveness.
- Conceptualized, designed, and tested both synchronous and asynchronous integration processes, aligning with client specifications and requirements.
- Engineered APIs using REST, optimizing communication channels to enable efficient and effective data exchange between interconnected systems, resulting in a 20% reduction in data transfer latency.
- Orchestrated Boomi process development, demonstrating proficiency in managing various data formats, including XML, JSON, CSV, and databases.
- Executed deployment of Boomi processes, overseeing API management and managing alert frameworks and exception handling mechanisms, resulting in a 50% decrease in system downtime.
- Leveraged a diverse range of Dell Boomi connectors such as Disk, FTP, Mail, Database, Salesforce, Atom Queue, HTTP client, and REST clients.
- Tested intricate XSLT transformations, enabling smooth transitions between various data formats critical, resulting in a 35% reduction in data transformation errors.
- Directed end-to-end testing and debugging of logic app workflows, ensuring optimal system reliability and performance, resulting in a 40% increase in system stability.
- Led migration initiatives of critical applications to cloud-based platforms, fostering scalability and adaptability while spearheading the modernization of legacy systems.

EDUCATION

(B.Tech) in Computer Science and Engineering

May 2017 - May 2021

SRM Institute of Science and Technology - Chennai

SKILLS

Integration Design  
Dell Boomi Architecture  
Synchronous and Asynchronous Integration  
Event-Driven Architecture  
API Design and Development  
ETL (Extract, Transform, Load)  
Data Mapping and Transformation  
Cloud Integration  
Security and Authentication  
Error Handling and Logging  
Performance Optimization  
Configuration Management  
Agile Methodologies  
Connector and Listener Configuration  
Integration Pack Usage  
Data Flow Optimization  
Azure Logic Apps Integration  
Documentation and Reporting  
Cloud Migration and Modernization  
Stakeholder Management  
Relational Database Management Systems (RDMS)

TECHNICAL SKILLS

**Programming Languages:** C#, Java  
**Database Technologies:** SQL, PL/SQL, Microsoft SQL Server, Oracle Fusion Integration  
**Integration and Web Services:** SOAP, RESTful, WSDL, API design  
**Development Tools and Environments:** Visual Studio, Notepad++, Dell Boomi AtomSphere, Azure Logic Apps, Azure Portal, Oracle SOA Integration.  
**Data Transformation and Schema Languages:** XSLT, XSD  
**Testing and Debugging Tools:** Postman, Putty, SOAP UI

CERTIFICATIONS

**Professional Integration Developer Certification** *Dell Boomi*  
**Associate Integration Developer Certification** *Dell Boomi*  
**Red Hat Certified System Administrator (RHCSA)** *Red Hat*  
**Associate Event Streams Certification** *Dell Boomi*
