Always prefer a challenging environment to grow up. I am not limited to learning one tool, I have potential and eagerness to learn more and more to keep myself updated. I have overall 3.8 yrs experience in Salesforce CPQ & Billing development and customization.

EXPERIENCE

Accenture, Bengaluru — *Salesforce Developer*
August 2019 – October 2021

1. Handling the core SFDC billing development in my project which is a scratch project including analysis, solutioning & development.
2. Posting of Invoices, credit notes, debit notes & pasting unique numbers based on requirement using Batch Apex and Apex triggers
3. Auto allocation of credit and debits to invoices without using the allocate button and restricting over crediting using the customization approach.
4. Have good knowledge on tax engine working, tax treatments, tax rates and successfully implemented tax calculation from various country to country and city to city and implemented the override behavior for the cross countries taxation.
5. Worked on standalone order features using REST API, flows & apex triggers.
6. Worked with complex lightning flows and have good hands-on different types of flows: - record triggered, auto launched, platform triggered, scheduled - triggered & screen flow.
7. Worked on platform events. Made processes asynchronous by publishing platform events and handling using lightning flow.
8. Created lightning flow endpoints for outside systems to call whenever they needed to create standalone orders in SFDC.
9. Built a prebill system before actual billing is done to meet client's threshold charges. This is done using batch calling another batch class sequentially.
10. Have worked on different types of product setup like bundles, subscription products & usage-based product required for different billing setups for quoting to ordering to invoicing i.e., usage based, recurring & one time.

Zensar Technologies, Bengaluru — *Salesforce Developer*
October 2021 – Present

1. Created Invoice PDF documents using Conga Invoice Generations.
2. Dynamically selecting invoice pdf based on different regions.
3. Built custom uplift functionality other than CPQ OOTB uplift without affecting additional discount.
4. Have a customized way selecting tax treatment for different regions.
5. Have worked on quote, quote line editor and have applied different pricing, discounts as per CPQ pricing waterfall.
6. Worked Bundles, Features, Option constraint, configuration attributes, Product rules and Price rules.
7. Handling billing module in this company project.
8. Contract Management.

SKILLS

- Salesforce CPQ & Billing
- Apex triggers, Batch apex, Queueable Apex, Schedulable class, Future method
- Process builder, Lightning flows, workflows
- Platform events
- SOQL,SOSl
- Reports and Dashboards
- Advanced approvals
- Conga Invoice Generations
- Salesforce Platform
- Sharing model

CERTIFICATION

- ADM201
- CPQ Specialist
- Platform Devloper-1

AWARDS

- Recognized as Being Awesome Youngster for my critical thinking and analysis on Billing Module

LANGUAGES

Hindi,Bengali,Odia,English
