WORK EXPERIENCE

Senior Developer

Cognizant Technology Solutions

03/2020 - Present

Pune

Achievements/Tasks

- Prepaid IT (Telefonica) - Development and analysis of production codes as per the design and requirement.
- Create unit test, component test and integration test using Mockito & JGiven to ensure stability and optimization.
- MasterCard Payment Gateway Services - Enhanced the payment gateway to optimize the transactions both at acquirer, issuer and merchant side.
- Ensured the quality of features/components in order to make the application scalable, distributed and fault-tolerant.

Software Developer

Tech Mahindra Limited

09/2016 - 02/2020

Pune

Achievements/Tasks

- Created Spring Boot based Java Micro services RESTful APIs and integrating them with BPMN Camunda. Used Mongo DB and Oracle as database.
- Exposure to DevOps tools like Jenkins, Pivotal Cloud Foundry, docker and Kubernetes. Built, deployed and managed the prod instances using the same orchestrators.
- Created an infrastructure to enable the automation of data loading into the application using ActiveMQ and ensured optimized performance.
- Successfully integrated the Microservices with BPMN Camunda according to the client requirement from scratch and managed the flow control for the same.
