EDUCATION

- **M.E** (Construction & Management)
  Pune University
  MIT,Pune

- **B.E** (Civil Engineer)
  VTU Belgaum
  DSCE, Bangalore

RELEVANT SKILLS

React.Js

Redux

React Hooks

JavaScript

Bootstrap

HTML

CSS

Node.js

MongoDB

CAREER OBJECTIVE

Seeking assignments in an organization that allows me to utilize myskills and can nurture them so that I can contribute highly in the growth of the organization individually as well as in team, while being resourceful, innovative and flexible.

PROFESSIONAL SNAPSHOT

- Currently working in **Radical Software** from **Nov 2019** to till date.
- 3 Years of working as on UI React JS - Software Developer.
- Having sound experience and exposure on UI development using React JS, Bootstrap, HTML 5, CSS, React Hooks and Redux etc.
- Ability to work under any given environment.
- Demonstrated good communication and Analytical skills.
- Team building skills, emphasizing versatility and adaptability.
- Dedication and drive as a hard-working individual.

SUMMARY OF SKILL

- React JS, JavaScript, ES6, React Hooks and Redux ,Node.js ,MongoDB HTML 5, CSS, Bootstrap.
- Worked on the Agile Scrum.
- Working experience in JSON, GitHub, Visual Studio Code.
- Ability to deliver a quality product on time and ability to work on challenging environment.
- Open for new technologies, challenges and quickly able to adapt new environments.
- Deliver the product on given time.

PROJECTS DETAILS

Project 1 : Vehicle Tracking
Role: Software Engineer

Description: The major goal is to provide fleet maintenance and tracking services using real-time data. Geofencing, over speeding and excessive idling notifications, vehicle health (engine overheating, low battery), and more services are available. Daimler plans to develop a shared marketplace for Fleet Owners and Load Owners, where load owners may post loads at any time and fleet owners can bid,receive confirmation, and begin transit.

Responsibility :-
- Developed responsive, accessible and resuable react components.
- Developed UI on React JS supported with few libraries like Material UI, React-router-dom etc.

- Developed e-transfer and account summary modules.
- Developed functionality to map data and push it to back and retrieve data as per requirement using specific wrappers.

Project 2 : Free Creatives
Role: Software Engineer

Description: Free Creatives is a web application that provides designer s ability to search through massive collection of designs such as flyers, invitations , brochures, mock-ups and resumes. It gives access to download the designs and registered users can upload the designs. It provides user an account and options to like, save, review and share the designs.

Responsibility :-
- UI development by using React JS with React Hooks.
- Managing application-level state by using Redux and Redux hooks – useDispatch, useSelector.
- Responsive web design by using React Bootstrap, HTML5, CSS3.
- Highly complex components designing by using React with minimum usage of third party NPM packages.
- Designing and using dynamic and reusable components.
- Implementation of connectivity with API services by using axios or fetch.
- Pushing and pulling code to GitHub repo.
- Design and develop static or dynamic components based on the requirements from product owner.

Project 3 : ShopeeCart
Role: Software Engineer

Description: It is E-commerce webApplication.

Responsibility :-
- Design and develop static or dynamic components based on the requirements from product owner.
- Design and develop static or dynamic components based on the requirements from product owner.
- UI development by using React JS with React Hooks.
- Pushing and pulling code to GitHub repo.
