SUMMARY

Full Stack Software Engineer having four years of experience With a passion for crafting innovative and efficient web applications, using technologies like React JavaScript, Python, PostgreSQL and AWS. Possessing a strong background in both frontend and backend development, I am adept at designing and implementing robust solutions that meet client requirements. With a keen eye for detail and a deep understanding of user experience, I strive to create intuitive and visually appealing interfaces. Collaborative by nature, I excel in cross-functional teams and thrive in fast-paced, agile environments. From conceptualization to deployment, I am committed to delivering high-quality code and exceeding project expectations.

EXPERIENCE

Frontend Developer

BD SECURITY SOLUTIONS

2019 - Present India

BD Security provide services and products such as installation, Operation and maintenance tools to the Reliance Jio Infocom Limited.

- Stay current with technology trends and developments in the industry and participate in service development.
- Implement improvements in the design of existing software architecture.
- Working in networking tools like Wireshark and Aircap.
- Worked with python to develop the automated solutions to include web interfaces using ReactJs, Redux, HTML, CSS and JavaScript
- Working with different teams to define tasks and test plans.
