Experienced Member of Technical Staff proficient in JavaScript and React-JS frontend application development and technical implementation. Detail-oriented and quality-driven professional with 7+ years of experience and expertise in React-JS, Redux, Redux toolkit, Javascript. Results-oriented technical lead with track record of success in resolving technical problems and providing support for various production issues with quick turnaround. Adept at troubleshooting complex technical issues and providing hands-on support to users. Possesses excellent customer service and time management skills.
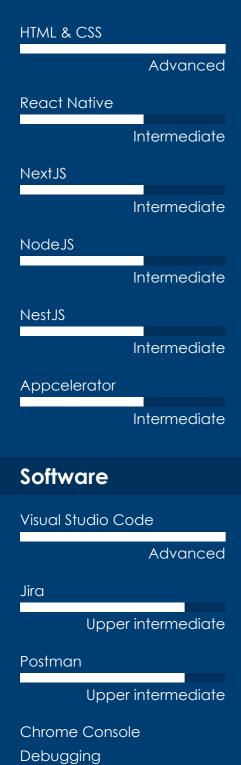

Work History

2022-01 - Current

Lead Member of Technical Staff

Mindstix Software labs pvt ltd., Pune

Roles and Responsibilities:

1. Client/Project/TechStack:-Staples - Staples.com and Staplesadvantage.com - ReactJS, NextJS

- Working majorly as software developer to create features for ecommerce website.
- Understand feature requirement and convert it to actual code.
- Worked on SKU page i.e. Product Details page which has header, footer, and main content which represent product details.
- Also worked on different variation of Product Tiles which is smaller representation of Product having lot of features which include Standard tiles, Carousel tiles, mini tiles, list tiles, Standard slim tiles. standard ITF tiles, List ITF tiles.
- Worked on other landing pages as well which includes BI Bundle, Category, Deals, Print and Marketing, Lewis & Compare page.
- Worked on migrating the above pages to NextJS layer under micro-frontend architecture changes to provide the smooth navigation from different domains.
- All pages are created using React.JS and Redux library and custom HTML, SCSS code.

2. Client/Project/TechStack:- Lennar - GFS and GFX - ReactJS

- Led 7-8 member of developers to create single page application using ReactJS library.

- Responsible for creating the baseline architecture needed to render the initial pages.
- Done setup of baseline for both GFS and GFX applications.
- GFS - Green Folder Standardization - Previously Lennar internally used a Green folder to finalize the land deal. But we took it up to standardize the process and make it entirely digital from creating a deal till purchase of the property.
- GFX - Green Folder Experience - In this project we have entirely changed the experience, Earlier in GFS user has to manually enter all the details. But in GFX user can drop a pin on Map which will get land parcel and according to that it will give all the detail related to it and use can create Lead and convert it to Deal.
- In GFX as I was responsible to create a baseline that had basic integration like storybook, Redux setup, MSAL authentication, Routing, Linting, husky, component directory structure.
- Improved GFX website performance tremendously and made it smooth with general optimization done throughout application.

2019-07 - 2022-12

Senior Member of Technical Staff and Tech Lead

Mindstix Software labs pvt ltd., Pune
Technology:- ReactJS and NextJS
Roles and Responsibilities:
Client/Project:-Staples - Staples.com and Staplesadvantage.com
1. Onboarded on Staples to work on Staples.com and Staplesadvantage.com which are B2C and B2B site to impower customer interaction for Staples.
2. Worked majorly on Deals page, Category page, Bundle page, Print and Marketing page, Super category page feature development.
3. Worked directly with client and product to understand requirement and code accordingly.
4. Worked using React.JS and Redux library to create an interactive UI features.
5. Worked on updating server side packages like client-service-product-tiles and client-service-lpd which are using to provide data to drive Product tiles and Product Tiles carousels.

6. Written unit test cases to increase overall code coverage of application using enzyme and jest which ultimately made application more stable.

| 2016-05 - 2019-07 | **Member of Technical Staff** |

Mindstix Software labs pvt ltd., Pune
Client/Project/TechStack:- VMWare - (vCharge, vTime, Enterprise Resiliency, Salespulse M, MyVmware, VoV) - Appcelerator - Mobile hybrid platform to create single JS based codebase to run for both Android and iOS.
Roles and Responsibilities

- vCharge - This was first project assigned, It was to give information related to empty charging points stations to EV users so that they can go to specific location point and charge it. This application was able to show different status depending on that end user understood if they have any empty space to park and charge and once charging is done alert notification was sent to remove EVs, this save lot of time for VMware employees.
- vTime - Relatively minor project to create timesheet application for VMware employees. With this application user log onto using SSO and then and fill up timesheet and send it for approval to manager.
- Enterprise Resiliency - This application was developed to fulfill requirement for emergency services to be available one click away. This application have integrated map/layout to display what to do in case of emergency like fire, earthquake etc..
- My Vmware - It was simplified application to manage product licenses and support management experience. In this project, I was responsible for migrating application to latest SDK of Appcelerator titanium which was improvement to previous versions.
- Also worked on updating Mixpanel analytics integration and migration to latest version for these applications.
- Worked on updating unit test cases throughout all applications that Mindstix's dev team was working on.

Education

2015-06 -
2016-01

Post Graduate Diploma in Advanced Computing: Computer Science And Programming

Center For Development of Advanced Computing(CDAC) - Pune

2014-06 -
2017-06

Master of Engineering: Information Technology

RMD Sinhgad Campus - Pune

2009-06 -
2013-06

Bachrlor of Engineering: Computer Science And Engineering

Jawaharlal Darda Institute of Engineering And Tech - Yavatmal

Accomplishments

1. Rising Star Award 2019- For the efforts and time spent and displayed great potential and enthusiasm to learn and grow professionally.

2. Exceptional Performance Award 2017 - Awarded surprise bonus for strong technical proficiency, outstanding communication skills, intense ownership and diligence towards the work and consistency in performance.
