PRASHANT KUMAR JHA   **(Mob: +917749994892)**
Email Id: prashantkjha2022@gmail.com

Professional Summary:

- Senior Software Engineer with 4.5year experience in developing, maintaining and deploying-web andclient-server-based applications.
- Involved in web-based application development and implementation of multi-tier architecture followed bydevelopment, maintenance, documentation and configuration of release management for the product's software release.
- Accustomed to Java8, Spring boot and Hibernate frameworks while operations in Restful web services.
- Knowledge in database like Oracle 11g, 12c, MySql and MongoDB.
- Understanding on Collections and object-oriented programming (oops Concept).
- Able to adapt to new technologies promptly hence ensuring to deliver the best in limited time.
- Hands-on experience with agile models and scrum calls with tools like JIRA, Confluence.
- Experienced in implementation of the version control software Git, Bit-bucket, Gitlab.
- Experience in product development modules for CGI TRADE 360 trading platform and Mobility Marketplace
- Worked on code quality coverage tool using Sonarcube and Sonarlint.
- Worked as Full stack developer role with Angular with Spring-boot and docker.

Technical Skills:

Technologies	JAVA
Frameworks	Spring 4.0, Spring Boot, Hibernate4.0, Angular
Application/Web Servers:	Apache Tomcat V9.X, Jboss
Database and Tools	Oracle 12g, MYSQL,MongoDB
Operating Systems	Window 10
Tools	MAVEN 4.x, JIRA, CONFLUENCE,SQL Developer, Postman, Microservice, Docker and AWS, JUnit , Junkins
Web and Client-Server Technologies:	Web services (Rest)
Version Control	Git, Bitbucket, Gitlab
CodeQuality Control	SonarQube 7.3
Domain Knowledge:	Trade Finance, Banking,E-commerce

Educational Qualification:

Examination	Discipline	School/College	Board/ University	Percentage
B.Tech	CSE	College of engineering, Bhubaneswar	BPUT	73%
Class XII	PCM	Rose public School	CBSE	76.2%
Class X	All	Gyan Bharti public School	CBSE	92%

Certification:

- HPES certified java developer.
- Java certification from JSpider Bangalore.
- SAFe5 certification from Agile.
- FullStack Coding using SpringBoot and Micro-services from Udemy.

Award and Recognition:

- Won performance & quality award in March 2021
- Won monthly performer award for commendable performance in OCT 2020 to JAN2021.
- Won recognition for quick & continuous delivery of modules in CGI.
- Key Contributor Award CGI -2020,2021.
- Quick learner Award 2019,2020,2021.
- Quality Coder Award 2022.

Work Experience:

Designation	Senior Software Engineer
Role	Senior Software Developer
Experience	1.1 years
Organization	HCL
Duration	Oct 2021-current

Profile of Prashant jha

Designation	Software Engineer
Role	Software Developer
Experience	2.11 years
Organization	CGI
Duration	Nov 2018- Oct 2021

Designation	Software Developer
Role	Java Developer
Experience	5 months
Organization	Stixis Technology
Duration	March 2018 – July 2018

Project Details:

Project #1:

October-2021- Present	
Project	**Mobility Market place**
Client	**BOSCH**
Environment	Springboot, Java 8, Hibernate, JBoss 7, Mysql, swagger,junit5,Web Services (Rest),Microservice
Role	Full Stack java Developer

Description:

Mobility Marketplace is providing e-commerce domain project which provide a platform to buyer and seller to utilize API and other product according to their requirement. User can easily use tryout and other feature according to their utilization .

Roles and Responsibilities:

1. Development:

- Development activities and periodic enhancement in the application.
- Making the required code changes and unit testing with Junit with full code coverage using Jacoco.
- Delivering API feature on expected date.

- Tracking defects in the JIRA.
- Skilled in use of STS as IDE in developing and MAVEN for builds and deployment of project jar.

2. Defect Addressing

- Unit Testing and Integration Testing.
- Resolving the issues reported during System Testing and UAT.
- Addressing the defect and making changes to the code based on coding standards using GIT.
- Bit bucket for code merge.
- Highly experienced in debugging and resolving complex pre-production, production and QA defects.

Project #2:

December-2018-October2021	
Project	**CGI Trade 360 Product**
Client	**HSBC**
Environment	JPA, Hibernate, JBoss 7, Oracle 12g, Web Services (Rest), Springboot, Java 8,Angular
Role	Full Stack Developer

Description:

The transaction processing system delivers all the advanced technology and services banks need in order to facilitate International Trade. Delivered from a private, highly secure community cloud, TPS runs bank's global trade business on a single instance of the platform. The TPS orchestrates workflow and rules processing across the entire platform and can be easily configured for a variety of operating models and cost structures.

Roles and Responsibilities:

1.Development:

- Development activities and periodic enhancement in the application.
- Making the required code changes and unit testing.
- Delivering renewed code on expected date.
- Tracking defects in the JIRA.
- Skilled in usage of IntelliJ as IDE in developing and MAVEN for builds and deployment of project WARs.

2.Defect Addressing

- Unit Testing and Integration Testing.
- Resolving the issues reported during Testing and UAT.
- Addressing the defect and making changes to the code based on coding standards.
- Provided by GITLAB for code rectification.
- Bit bucket for code merge.
- Highly experienced in debugging and resolving complex pre-production, production and QA defects.

Project #3:

March-2018-August 2018	
Project	**Tracking Management**
Client	**SAMC**
Environment	Git, Sonar cube, Oracle 12g, Java 7.
Role	Java Backend Developer

Description:

Fully developing customer B2B portal from scratch to end.

Roles and Responsibilities:

- Worked on generating custom Form classes.
- Worked on tools like JIRA, confluence to track daily activities
- Resolving the issues reported during Testing and UAT.
- Bit bucket for code merge.
- Highly experienced in debugging and resolving complex pre-production, production and QA defects.
