WORK EXPERIENCE

21North | Dec 2021 – Present

Full Stack Developer

- Worked on building a new ticketing system single handedly from scratch for my organization that is being used as the only system by the support users for any and all issues reported during the lifecycle of the process
- Creating the System Design including the Database design
- Evaluated alternative approaches and presented recommendations to teams and unit leadership.
- Managed both back-end and front-end aspects of development process.
- Took the product from Planning to Production
- Assisted other developers with coding, troubleshooting and debugging.
- Working on migrating an existing system from PHP to Python.

GALE Partners | Jun 2021 – Nov 2021

Full Stack Developer

- I am a part of a team who are responsible for maintaining the internal projects at the organization
- Worked in revamping the entire Vacation and Timesheet module used by the entire organization
- Worked on all support issues that were reported regarding any of the internal projects
- Worked on creating multiple dashboards and organizational Chart
- Improved and corrected existing software and system applications.

Soroco | Jun 2019 – May 2021

Software Developer

- Worked on building an Automation System for a top Pharmaceuticals company
- Automating daily tasks of employees which in turn reduces the time taken for an entire process in company
- Work with the client and change the Automation System as per requirement
- Worked on this project from the start to the production release as a sole developer
- Conducted full lifecycle software development from planning to deployment and maintenance.
- Reviewed and modified unit and integration tests to improve software quality and reliability.
- Met with stakeholders, product teams and customers throughout system development lifecycle.

Infosys | Feb 2016 – May 2019

Senior Systems Engineer

- The purpose of the project was to build enterprise content management solution, which was capable of migrating huge amount of structured, semi-structured and unstructured data from Documentum to HBase
- Extraction, Transformation and Loading of data as per requirement while keeping in mind the standards to be followed
- Provided development assistance, support for the modules and also run the module in the production environment
