Vinay Balwant Bhurkunde

Software Developer in Test

✉ vinaybhurkunde@gmail.com | 📞 +91 7038931401

Professional Summary

- Experienced professional with over 8.8 years of comprehensive experience in software testing and development.
- A dynamic, team-oriented Software Test Engineer specializing in both **Manual** and **Automation testing** methodologies.
- Possesses 5+ years of expertise in **Automation** using **Java with Selenium**, along with 6 years of hands-on manual testing experience..
- Additionally, proficient in **API Testing** with Rest Assured, accumulating 2+ years of dedicated experience
- Demonstrates exceptional **Team management skills** with 4 years of leadership across multiple projects simultaneously. Exhibits a track record of client engagement spanning over 4+ years.
- Proficient in **DevOps** tools including **Docker**, **AWS**, **Ansible**, **Terraform**, **Sonarqube** and **Kubernetes**, with 6 months of hands-on experience.
- Proficient in Testing **Microservices** utilizing Kubernetes and skilled in version control systems like Git/GitHub
- Skilled in designing and implementing **CI/CD pipelines** using tools such as **Jenkins**, **GitLab CI/CD** or Travis CI to automate software delivery processes and streamline deployments.
- Demonstrates expertise in **Behavior Driven Development** (BDD) with **Cucumber framework** and **TestNG framework**
- Experienced in **Mobile Apps Testing** using **Perfecto** and adept at handling Scrum methodologies as a trained Scrum Master.
- Possesses 6 years of experience in **Agile Methodologies**, with a keen understanding of software business requirements and application flows
- Proficient in identifying Requirement Gaps and prioritizing tasks effectively.
- Skilled in **GUI testing**, **System testing**, Software development engineer in test, **Load Testing**, **Regression testing**, Re-testing, and Compatibility testing. Routinely conducts Automated Health checks and adept at defect reporting using tools like **TDP (IBM tool)**, **Jira**, **Qtest**.
- Exceptional oral and written communication skills coupled with strong interpersonal abilities.
- Demonstrates the capacity to coordinate activities efficiently and thrive in team environments. Proficient in multitasking across diverse applications.
- Additionally, boasts experience as an Android and Web application Developer.

Educational Qualification

- **Bachelor of Engineering in Information technology**(B.E) from Rashtrasant Tukdoji Maharaj University, Nagpur (Nagpur University).
- HSC from Nagpur Board.
- SSC from Nagpur Board.

Technical Skills

- **Testing Tool**: TDP, SOAP-UI, JIRA, ServiceNow
- **Technical Skills**: Selenium, TestNG, JUNIT, Maven, Eclipse IDE, Postman, SOAP-UI & REST API, Perfecto, Git/ GitHub, CI-CD pipeline
- **Testing Skills**: Progression Testing, Regression Testing, Device Testing, Manual and Automation Testing, Load Testing
- **Programming Languages**: C, C++, Core Java, Android, Dotcms, Python, Phone gap, Unix/Linux
- **Database Systems**: Oracle 9, MySQL 5.5, node.js
- **Web Technologies**: HTML5, CSS3, HTML, JavaScript, JQuery, Ajax
- **Other Technologies**: Computer Hardware and Networking, Adobe Photoshop
- **Application/Tools**: Siebel (Ticketing Tool), Cytrix, Netbeans, Eclipse IDE, Android Studio, Adobe Dreamweaver, CSS, Flow, Elementary Management System, EOPS, Jira, Postman
- **Operating System**: Windows XP, Windows 8, Windows 10 Pro, Office 2008 & 2012 support, Ubuntu

Experience

Incedo Technology Solution Limited

Senior Test Engineer **07 Sept, 2021 - Present**

- Project: Verizon
- Domain: Telecom
- Description: Project is related to telecom where we were managing Verizon application and managing authentication and login functionality of various web apps like MVA, MDOT, MMG, VCG, MVO, FR7. We make sure the user should be able to sign in to above-mentioned apps with ease and they should be able to re-login again in cases of forgot password, forgot User id or forgot secret question answer.

Roles and Responsibility:

- Testing login functionality using manual and automation
- Analyze the requirement and design automated Test cases to ensure full coverage of the web app.
- Primary focus on developing automated test cases, script with the help of the existing framework.
- Test case management which includes maintaining and updating test cases, running regression test cases and monitoring the status of Tests.
- Working closely with developers, product owners and other stakeholders.
- Execute automated Test cases, analyze the result and report defects.
- Working on Progression and Regression Stories.
- Writing Automation script for Health Check files.
- Supporting in Production Validation at the time of ER, AMR, or any emergency releases.

Maxima Consulting India Pvt Ltd.

Consultant **21 Oct, 2020 - 06 Sept, 2021**

- **Project**: State Street
- **Application**: CashHub
- **Domain**: Banking
- **Description**: Project is related to handling of Transaction and allocating the amount as per the profile set by the client for services like Threshold, Allocation, Ingest, Intake. Handling of cash-based transaction and maintaining logs.
- **Roles and Responsibilities**:
  - Working on GUI Automation framework and creating common functions and methods by analyzing UI.
  - Developed Project structures and explained thoroughly to team.
  - Analyze and understand the SRS document to build the test scripts.

Tech Mahindra

System Engineer   **23 May 2017 – 10 Jan 2020**

- • **Project**: EDocE
- • **Application**: EDGE Dispatch
- • **Client**: AT&T Inc
- • **Environment**: UNIX
- • **Tools**: Selenium Web driver with TestNG framework, TDP RQM (defect management tool by IBM)
- • **Domain**: Telecom
- • **Description**:
  - – EDGE (Enterprise Dispatch GUI environment) is basically a dispatch system which monitors the daily load or orders to work upon flown down from upstream applications like WFAC, TIRKS, LMOS and SOP etc. Now according to APD rules set it will determine the appropriate job/order to assign to work list of technicians. Once the job is assigned it is the duty of technician to complete it by either going to customer premise (OUT jobs) for doing necessary settings like making new connection or by performing the from central office (IN jobs). The vision of EDGE program is to consolidate multiple dispatch systems into a single, corporate-wide dispatch system which will lower cost and increase productivity. This path will support current and future AT&T product offerings with an end result of increasing the quality of customer service.

- • **Roles and Responsibilities**:
  - – Design the test scenario and test case from use case present in Requirement Document, AID/IDT.
  - – Understand the customer requirement and analysis.
  - – Execute the test cases based on the requirements (SRS).
  - – Performed functionality testing, System Testing, Regression Testing, E2E Testing, IST Testing.
  - – Prepared Test Plans and upload the test cases as well as mapping of test cases to user stories.
  - – Used Bugzilla and TDP tool for Defect Tracking and reporting.
  - – Prepared Traceability matrix.
  - – Involved in Scrum Meeting to discuss the requirements, Issue, daily status, environmental setups etc.
  - – Updated the bug status and discussed with developers to resolve the bugs/defects and mark its status in TDP.
  - – Prepared test summary reports, defect summary reports and send to test lead or add on PRISM for clients review.

Infosys, Pune

Duration: 19 Oct 2015 to 17 May 2017

1. **Project Name:** Datapulse **Designation:** Mobile App Developer (Android) & Web Developer

   - • **Overview:** Datapulse Project aimed maintaining employee records about work, attendance, performance so that they can manage weekly as well as monthly scheduled.
