About

Full Stack Developer with 3 + years of hands-on experience designing, developing, testing, deploying applications and solutions using a range of technologies and programming languages. Seeking to leverage broad development and hands-on technical expertise in a challenging role as a Full Stack Developer.

Preferred location: Bangalore/ Chennai.

Skills

Java, Angular JS, Spring boot, Angular, JavaScript, HTML5, CSS3, Hibernate, JPA, Maven, Jenkins, Docker, Apache, Oracle, MySQL, JSON & XML, GIT, Postman, Soap UI, Shell commands, Rally, Jira.

Experience

Tata Consultancy Services / System Engineer

DEC 2017 - PRESENT, CHENNAI

- Developed 6+ full stack web applications that helped in providing one stop solution for client's multiple requirements.
- Used the latest industry adopted technologies and frameworks as well as ensured application's security and ability to interact with multiple API's and databases.
- Developed a Spring scheduler module that replaced the UI automation by interacting with Elastic search APIs which reduced the process run time to under 2 minutes.
- Designed and developed an UI that needed parent-child relationship data structure right from database design until displaying the data to the UI.
- Worked on Agile methodology with good expertise on all the concepts and nuances of Agile. Contributed as a scrum master to my team on some of the PI's.
- Worked closely with the Product Owners and clients for bringing in new enhancements, architectural suggestions and innovations for improvising the process.
- Exhibited good problem solving and analytical skills in all the modules I have built so far.
