Summary

- **Around 8 years** experience in **NetSuite Development, Implementation & Customization.**
- Expert in **NetSuite Suite Builder, Suite Script, RESTlet and Workflow** tools.
- Expert in **Suite script 1.0 and 2.0**.
- Involved in **NetSuite Development, Testing and Bug Fixing**.
- Strong experience in **NetSuite Suite Bundler**, **NetSuite Suite Script** and building new custom objects Experience and **NetSuite Administration** (mid-level to understand the impact).
- **End to end NetSuite process knowledge to guide support team.**
- Worked on different types of SuiteSripts **like User Event Script, Suitelets, Schedule Script, Map/Reduce Script, Client Script, Portlet Script, Bundle Installation Script and RESTlet.**
- Developed a **SuiteApp i.e Sanmina easeFlow for NetSuite and 42Q Netsuite Adapter**
- Integration with **Oracle E-Business Suite, Big commerce, Salesforce, JIRA,Coupa and other 3rd party application**.
- **Maintain users, roles, security, profiles, workflow rules**
- **Customize NetSuite fields, page layouts, record types, reports and dashboards**
- Understanding the business processes like **Lead to Customer, Order to Cash**, **Procure to Pay, AR, AP GL** and Work Order Process.
- **Fields creation, Forms Customization, CSV Imports and User Role setup/configuration.**
- Experience in **Celigo (integrator.io)**
- **Creation of SuiteBundle** and **Installation of SuiteBundle** in Sandbox/ Production Environment Process.
- Expert in Prepare Reports like **Saved Search**.
- Basic Technical and Functional knowledge on **Coupa**, **Salesforce** and **Oracle E-Business Suite.**
- Preparing **deployment process document** before deploy to NetSuite Production.
- **Having 1+years** of experience in all phases of **software development life cycle** including **requirement analysis, development, debugging, testing and deployment** of small to mid-size Intranet and Internet based web applications using **Java, J2EE, Struts** application server technologies.
- Experienced in writing **SQL queries** using Oracle**.**
- Good knowledge in IDE tools like **Eclipse.**
- Good knowledge on Suitecloud Development Framework(SDF)
- **Ability to work as part of team as well as individual.**

Objective

Aspiring to work with innovative team, in the area of Information Technology, and contribute my best with hard and aimed efforts, thus helping in growth of organization from where I can gain domain and technical knowledge.

Work Experience

- Working for **Infosys(Bangalore)** as a **Consultant** (Aug 2019 to Till date)
- Worked for **Born Group(Bangalore)** as a **Sr Software Developer** (Nov 2018 to June 2019)
- Worked for **Sanmina(Chennai)** as a **Netsuite Application Developer** (Jul 2016 to Nov 2018)
- Worked for **Tech Mahindra(Bangalore)** as an **Associate Team Lead**(Oct 2015 to Jun 2016)
- Worked for **Qualys Security Tech Services Pvt. Ltd.(Pune)** as an **Application Developer**(Dec 2014 to Oct 2015)
- Worked for **Adaa IT Solutions(Bangalore)** as a **Software Engineer**(Sep 2013 to Oct 2014)

Skills

Programming Languages/ Frameworks/Scripting:	NetSuite, Suite Script , Java Script , HTML ,CSS,Core Java, Servlet, Jsp, Struts
Servers:	Apache Web Server, Web Services
IDE/Tools:	Eclipse 3.5,Notepad++
Data Base	MySQL, Oracle
Operating System:	Windows XP/2K/7, Linux, Unix.
Incident Tracking Tool:	JIRA,KACE Dell
Documentation:	Confluence ,Box
Rest Service Tool:	Postman, Restful, SoapUI

Project Details:

Title	:	**Netsuite Integration with Oracle E-Business Suite**
Technology	:	**Netsuite Suitescript,**
Role	:	**Developing and Customizations**

Description:

This project implemented in Sanmina Corporation. Sanmina Corporation is a global electronics manufacturing services (EMS) provider and The Company is one of the world's largest independent manufacturers of printed circuit boards and backplanes. Sanmina Corporation is using Oracle ERP and Sanmina having own interface is name as **Easeflow**. Using **Easeflow** integrate with Netsuite. When SO, PO record is create or update in netsuite, automatic sync SO/PO record details with Oracle ERP.

Responsibilities:

- Creating RESTlet and UserEvent Script requires for integrate with Easeflow.
- Creating Bundle Installation Script for install bundle in other instance to update data in Netsuite.
- Debugging and troubleshooting issues in production environment.
- Responsible for requirements gathering, analysis, and system design and also interacted with business users in analyzing the requirements.
- Deployment of the script, maintenance, bugs fixing.
- Interacting with the internal team doing the changes they required time to time
- Go Live Support

Title	:	**Automation of Task Assignment to Salesrep**
Technology	:	**Netsuite suitescript,javascript**
Role	:	**Developing and Customizations**

Description:

This project implemented in Qualys, Inc. Qualys, Inc. is a provider of cloud security, compliance and related services for small and medium-sized businesses. Netsuite create a task and assign to sales rep using Qualys website. In Qualys Website having different product with subscription details, those customer interested with product, filled the form and sales rep is contact with customer.

Responsibilities:

- Creating scripts requires for the application
- Responsible for requirements gathering, analysis, and system design and also interacted with business users in analyzing the requirements.
- Deployment of the script, maintenance, bugs fixing.
- Interacting with the internal team doing the changes they required time to time

Title	:	**Automation of Fulfillment and Integration With SOA and upadate in Oracle10g DB**
Technology	:	**Netsuite suitescript,javascript**
Role	:	**Developing and Customizations**

Description:

This project implemented in Qualys, Inc. Qualys, Inc. is a provider of cloud security, compliance and related services for small and medium-sized businesses. Using Custom Button like AutoFullfill to automate the fulfillment and integrated with SOA(service oriented architecture) and its update in oracle database.

Responsibilities:

- Creating scripts requires for the application
- Responsible for requirements gathering, analysis, and system design and also interacted with business users in analyzing the requirements.
- Deployment of the script, maintenance, bugs fixing.
- Interacting with the internal team doing the changes they required time to time

Title	:	**Partner Record Integration with SOA and upadate in Oracle10g DB**
Technology	:	**Netsuite suitescript,javascript**
Role	:	**Developing and Customizations**

Description:

This project implemented in Qualys, Inc. Qualys, Inc. is a provider of cloud security, compliance and related services for small and medium-sized businesses. When partner record is create or update in netsuite so in that time all the partner record details are sync with SOA(service oriented architecture) and its update in oracle database.

Responsibilities:

- Creating scripts requires for the application
- Responsible for requirements gathering, analysis, and system design and also interacted with business users in analyzing the requirements.
- Deployment of the script, maintenance, bugs fixing.
- Interacting with the internal team doing the changes they required time to time

Project Title : **Firefly - Vape integration**
Technology : **Netsuite, Suitescript, Restlet, Java Script**
Role : **Netsuite Scripting and Customizations**

Description:

This includes integration to communicate both the account with each other. Firefly and vape are two separate accounts where firely is customer and vape is vendor account. Process starts with scheduled script which sends drop ship PO details to vendor i.e. vape account and sales order is created in vape account through the rest let. Again when fulfillment is created it is sent to the other account. Sending invoice is also done.

Responsibilities:

- Creating scripts requires for the application
- Deployment of the script, maintenance, bugs fixing.
- Interacting with the client solving issues as well as doing the changes they required time to time

Title : **MindJet(MJ) Renewals**
Technology : **Netsuite, Suite script, Java Script**
Role : **Netsuite Scripting and Customizations**

Description:

MJ Renewals enables to keep track of the previous items from which the current item is renewed. Mindjet sells license. So when it expires have to renew again for further use .So whenever orders are created have to track the previous order.

Responsibilities:

- Creating scripts requires for the application
- Responsible for requirements gathering, analysis, and system design and also interacted with business users in analyzing the requirements.
- Deployment of the script, maintenance, bugs fixing.
- Interacting with the client solving issues as well as doing the changes they required time to time

Other Netsuite Project:
I worked on different projects like,
Consolidated Invoice generation:
In this project, we provided an interface to choose the bulk Invoices. On select of the invoices we grouped those invoices by customers and created Consolidated Invoice PDF and Excel file for customers.
Particulars: Suitelet, Schedule, Client

Scheduled process to send collections emails:
As per the requirement we checked for the Customers based on some criteria to send Collection email on schedule basis (on particular due date). We merged specific email template to send the collection Email.
Particulars: Schedule script, Email template

Creating a script to call on button click to generate a pdf of Item pricing list
In this script, a function is called on click of a button to generate a pdf. It first checks Customer's 'Price level' value. It searches for Inventory Items (Stock Status=Current and Product Line=Signature Series/Power Series/Rain Series), and depend on the Market segment value checks the Items'

Market fields, after all these checking, depend on the 'Price Level' retrieves the 'Price' value for particular Item and then generate the PDF for printing Price list.

Stratford Schools: Enrollment, Re enrollment and Fee Calculation automatically.

- **User Event:** Work on different function like before Load, before submit and after submit.
- **Client Script:** Update Fields, Validate Fields, Create Button, Validate Line Item.

- **Scheduled Script:** Number of record update simultaneously.
- **Suitelet Script:** Create and Print PDF Generate, Create Sales order and Purchase Order. Customized record. Create HTML Page by using suitelet.
- **Restlet Script:** Third party Integration
- **Portlet Script:** Designed a Dashboard using portlet.
- **Bundle Installation Script:** after and update install function

Educational Qualification:

- B.Tech in 'Computer Science & Engineering' from 'Biju Patnaik University of Technology', 2010 with **7.3 CGPA** (**73%**).
- Diploma in Computer Science from SCTE & VT, Orissa, 2007, with **70%**.
- Matriculate from BSE, Orissa, 2004, with **65%**.

Certificate of Achievement:

- **Sun Certified Java Professional (SCJP) with 78 %**

Personal Details:

Father's Name	**:** Krushna Mohan Panigrahi
Permanent Address	**:** Brahma Nagar, Berhampur, Orissa,India-760001
Date Of Birth	**:** 12th Mar 1988
Languages Known	**:** English, Hindi, and Oriya.

DECLARATION:

I hereby declare that all the details given above are true to the best of my knowledge and belief.
