Projects Summary

Note: Not all the project that I have worked is mentioned in the list below. But I am having good experience in customization, full implementation projects.

Project-

Project : POS (Point of Sale) Desktop Application (Integrated with NetSuite)

Description: This Project is developed for one of our clients. The Whole data is transmitted from ERP (NetSuite) from Login Details to Product Descriptions and Transactions. This Project Is Directly Linked with ERP (NetSuite).

In this Project the Transaction Data of POS will move to ERP Cloud Server (NetSuite) as well as in the local database also.

It is the point at which a customer makes a payment. It is mostly used in the retail shops and medical shop. At the point of sale, the merchant would prepare an invoice for the customer otherwise calculate the amount owed by the customer and provide options for the customer to make payment. After receiving payment, the merchant will also normally issue a receipt for the transaction. The point of sale

is often referred to as the point of service because it is not just a point of sale but also a point of return or customer order. It contains the functionality, such as inventory management, CRM, financials, transactions Reports etc.

Role and Responsibility:

- Involved in Coding on Java.
- Involved in Calling NetSuite Web-Service.
- Involved In Database Coding.
- Involved In Designing.
- Involved in Server Coding.
- Involved in Unit testing of Application.
- Involved in Back-end Development of Application.

Project–

Project: VMI Module (NetSuite)

Description: This Project is developed for the One of our NetSuite Client. The custom Sales Contract record will be created for each customer from PC or by android/iOS phone and new unique contract number will be generated for each Custom Contract record. On creation of new contract record the details PDF will be send to the customers. And the one approval link will send to the admin to approve that contract. Each and every functionality of contract record can also be handled from android phone (new, updating).

Role and Responsibility:

- Involved in Coding on Suite Script.
- Involved In PDF Creation Code.
- Involved In Designing.
- Involved in Unit testing of Module.

3. Project

Project : Integration from different legacy system using third Party Integration tool (Dell Boomi).

Description: Integration Project

Role and Responsibility:

- Involved in Suite Script Coding.
- Involved in PDF Creation using Suite let.
- Involved In Designing.
- Involved in Unit testing of Module.
