- Secured Second prize in Essay Writing in academic stage.

Projects Description

• **TGM Panel, Technology(React JS)** TGM Panel is an online research panel where your opinion transforms into money. It's very easy: sign up, provide your mobile and e-mail address and receive from us invites to online paid surveys (you can complete only those paid surveys that you want), redeem your rewards. Completion of the paid survey takes a short time and you can answer questions it at any time, on any device with Internet access. Just answer questions, make money and get rewards. You can earn for filling in a single internet survey. You will be rewarded for every survey you complete. The amount of money you will receive depends on the length and type of survey as soon as the survey is finished, rewards are added and accumulated on your panel account. Once you reach transaction minimum you can transfer your money to your transaction account.

• **Bisex-Social networking app,Technology(React JS)** Bisex is a social network for professionals. Whether you're a marketing executive at a major company, a business owner who runs a small local shop or even a first year college student looking to explore future career options, LinkedIn is for anybody and everybody who's interested.

• **Sav-Ez,Technology(Angular JS)** Sav-Ez is a grocery shopping android application where users can purchase and order groceries online. It delivers a wide range of groceries available online. Users have to first login into the system to view the groceries and add them into their cart. They can then order it by making a secure online payment via CREDIT CARD. The system functionality of products and orders is stored on server side in a web service. The android app is for client usage. It consists of client side scripting for placing orders by connecting to the server side web service.

• **Marchant App,Sav-Ez,Technology(Angular JS)** Marchant App is a android application where all placed order report and actions of sav-Ez app are show in-side this app. Rejected and approved order are showing through bar , line and doughnut chart.

Responsibilities and Contributions:

- Developed innovative **user-facing features** using **React.js**. Optimized components to **enhance performance** across a vast array of web-capable devices and browsers.
- Developed **reusable** components & front-end libraries for future use,to bring scalability. Translated designs & wireframes into **high quality code**.
- Applied **optimization techniques** to reduce page size and **load times** to enhance user experience and performance using **sprites**.
- Communicated with clients frequently to **gather requirement** & **shared the valuable suggestions**, which have been **appreciated**.
- Incurred experience invaluable stages of SDLC like **project planning**, involved in writing the **Project Design Document**, **Project Plan Document** and **implementation**. Also, performed automation testing via **selenium webdriver**.

AngularJS Contribution:

- **Replacement** of web applications.
- **Developed** and **designed** SPA user interfaces.
- **Worked on Front end** by using AngularJS, JavaScript.
- **Connected the API's** using Angular.js \$http service.
- **Designed dynamic and multi-browser compatible** pages using HTML, CSS, AngularJS and JavaScript.
- **Validations** through AngularJS for the form field, implemented through HTML5.
