Database	MySQL
API Testing	Postman
Process	Agile
Other Tools	Bugzilla, TestLink, Putty, SipPhone, Winscp, Eclipse

EXPERIENCE DETAILS (PROJECTS):

#Project1

Title: Kirusa Konnect

Description: Kirusa Konnect is a cloud-based Communications Platform as a Service, designed to bolster audience engagement over mobile channels. The Konnect suite is composed of a set of unique inbound and outbound communication tools. These tools are highly customizable, and complement each other in crafting robust campaigns.
Konnect's inbound tools include Snap call, Konnect's Interactive Voice Response System, inbound SMS.
Konnect's outbound tools include outbound diallers, SMS Tagging, Outbound SMS.

Responsibility:

- Detailed study of the Software Requirement Specification.
- Understanding the Functionality and perform Manual Testing.
- Involved in Project meetings and documentation.
- Prepare and execute Test cases against the functional specifications
- Verify the database and Tracking defects.
- Configuring server for IVR and Missed call for voting purpose and test the same with the help of Ekiga, X-Lite tool.
- Configure and Perform API Testing for inbound and outbound SMS with the help of Postman.
- Writing REST API Automation Testcases using Rest Assured environment and Cucumber framework.
- Identifying Automation Scenarios from the set of Testcases/User stories identified in cycle.
- Developing Web Automation Testcases for the identified Automation Scenarios.
- Knowledge on Cross Browser Automation using Selenium GRID with Sauce Labs Cloud Integration.
- Running Smoke regression suite after every build and publish the detailed reports with the bugs detected.
- Running Full Automation suite for every Release and analyse the root cause of Failed scripts.
- Developed Pageobject Model Design Selenium framework on TestNG Platform.
- Used Build Management tool Maven in the framework for batch triggering of Testcases.
- Integrated complete framework with CI Tool Jenkins for Scheduling the Testcases.
- Maintained the Selenium & JAVA automation code and resources in source controls like Github, SVN over the time for improvements and new features.

#ProjeCT2

Title: myGenie mobile application (Earn Free Airtime Every day)

Description: myGenie is the best way to earn FREE airtime every day. myGenie lets users explore best apps, download them and earn airtime every time. Users can recharge mobile for themselves and for others. We constantly add new App offers every day to earn free airtime by installing new Apps.

Responsibility:
