- Creating dashboard to see customer journey.

Technology, Tools and Framework Used –
Technology - Java, ReactJs, MongoDB,MySQL, Basics of Angular and Python.
Framework – Spring Core, Spring JDBC, Spring MVC , Spring boot, Stuts, Junit, Zest and Enzyme.
Tools – Eclipse, Visual Studio Code, MongoDB Compass Grafana, Git, Postman, SoapUI.

PERSONAL INFORMATION

Gender -Male
Nationality - Indian
DOB - 27/06/1994

coMakeIt (2018-2019)

Project –Moveware

Description – Moveware is a company dedicated to providing unparalleled software and support services to the Moving & Storage Industry. We are modernizing the existing application with latest technology.

Responsibilities–
- Implement functionalities Java as backend and Angular as a frontend technology.
- Unit Testing and Deployment.
- Migration old project from old tech stacks to new tech stacks.
- Creating dashboard to see customer journey.

Technology, Tools and Framework Used –
Technology - Java, Angular,Akka, MongoDB.
Framework –Spring boot, Mockito, Junit.
Tools – Eclipse, Visual Studio Code, MongoDB Compass, Git, Jenkins, Maven, Postman, keycloak.

TCS (2016-2018)

Project - Polaris - AXA Germany

Responsibilities-
- Gathering the requirement from client and analyzing the requirement specification.
- Finding out ways to meet customer requirements through the creation of appropriate deployment plan.
- Development of code, Code review, Unit testing of developed application, on time and defect free deployment of application.
- Tracking and management of defects and its quick resolution.
-

Technology, Tools and Framework Used –
Technology - Java, Selenium, MySQL.
Framework –Spring Core, Spring JDBC, Spring MVC, Cucumber, Junit.
Tools – Eclipse, SVN, Jenkins, Maven, SoapUI, ReadyAPI.
