SUMMARY

An experienced technical consultant with a demonstrated history of working in the information services industry. Skilled in NetSuite, developing web applications, NetSuite customization, Software as a Service (SaaS), and Business Process Improvement. Can design, develop, integrate, and maintain scalable complex business applications. Has fairly good knowledge of the Manufacturing and Retail industries. Quick learner. A strong information technology professional with a Bachelor of Technology (B.Tech) focused on Information Technology.

EXPERIENCE

NETSUITE TECHNICAL - SENIOR ASSOCIATE ANALYST

Jade Global
January 2022 - Present

- Working with the payments and retail team with multiple stakeholders on a $1mn+/yr project for a B2C retail company on their P2P and O2C processes.
- Communicated with the Klarna team and optimized the client's payment processes integrated with Klarna.
- Performed several discoveries and optimized the client's Loyalty program integrated with Cheetah.
- Solved a major issue that saved the client from incurring losses over $30k/quarter.
- Writing test cases before each code push using JEST for unit testing.
- Following coding practices of the highest standard in a CI/CD environment using Jenkins, ESLint, and maintaining the GitHub repository branches with code reviews at each level.
- Tracked and identified integration bugs using Sumo Logic and solved them.
- Grooming and training new college graduates for Functional and Technical knowledge regarding NetSuite and the client's business processes.

NETSUITE TECHNICAL CONSULTANT

Paapri Cloud Technologies
March 2020 - January 2022

- Worked with Lead Consultants and Subject Matter Experts to design new processes in NetSuite using standard functionality and customizations.
- Worked with project teams on new NetSuite implementations and changes to existing systems.
- Ensured completion of tasks, milestones, and components including functional specifications, design specifications, configurations, quality assurance, implementations, and project reviews.
- Worked with team members to redesign client business processes.
- Worked with Management, Project Managers, Business Analysts, Sales and Marketing, and Accounting & Finance to scope work and produce estimates to help define deliverables and timelines.
- Built saved searches and dashboards that provide comprehensive and forward-looking Business Intelligence.
- Created NetSuite forms, and transaction PDFs [Advanced PDFs], developed, tested, and deployed customizations, custom records, workflows, scripts, and roles to support the company's channels structure and business rules.
- Conducted NetSuite customization PoCs and quantitatively measured their successes.
- Created training/support documentation, and drove end-user training to promote user adoption and to effectively use systems features and applications.
- Created test cases with Functional Consultants to ensure system configuration objectives have been met.
- Resolved Trouble Reports during User Acceptance Testing.
- Tracked, monitored & resolved bugs/issues identified during SIT and UAT.
- Worked on a Finite Scheduling Manufacturing System integrated with NetSuite where the end-user can view, track, edit and save changes through the Gantt Chart.
- Worked on front-end and back-end development from scratch for the first version of PCT ERP with MERN Stack, the company's own ERP system.
