EXPERIENCE SUMMARY:

10+ years of Software Development Experience.

- o **Having good exposure on Salesforce Platform and Conga (Apttus) Products like CPQ, CLM, Ecommerce.**
- o **Salesforce certification on PD1.**
- o Having good hands-on software development experience with the latest Microsoft technologies .NET Framework 4.5, **.Net Core, C#, MVC 6**, **Web API**, **SignalR (For Live Notification)**, Entity Framework, Razor, REST Services, MS Azure, Azure Service Fabric APIs, Jenkins, GIT repo (BitBucket)
- o Working experience on Azure cloud and Jenkins for deployment.
- o Lead *Transformation projects*.
- o Extensive experience with Migration strategies and Have knowledge of various paradigms of **Single Page Application (SPA)** and interfaces of Legacy Applications.
- o Good Team Players and very eager Learner.
- o Good exposure with the JavaScript frameworks like KnockoutJS and jQuery.

ONSITE EXPERIENCE:

	Microsoft- Hyderabad		**HDFC ERGO -** Mumbai.

FUNCTIONAL SKILLS:

Management and Leadership Skills	o Extremely efficient in technical roles that demand rigor, a high level of drive and dedication and a focus on delivering business outcomes through the use of standard methodologies and technologies
	o Hands on experience in Collaborating with business analysts, testers, developers and other team members in the overall enhancement of software product quality
Training & Development	o Served as Facilitator for conducting MVC, WebApi trainings internally for new team members.
	o Mentored new team members who joined the project and help them to improve their technical and domain skills.
	o **Delivered sessions on web security to improve security and quality of application suites.**

TECHNICAL SKILLS:

Programming Skills:	o Microsoft Visual Studio 2015. o .Net Framework 4.5, C# 6.0. o ASP.NET, MVC 5, Web API 2.0 o Aspx & Razor engine. o Entity Framework 6.0 o StyleCop,Code Analysis& Matrices. o Apex Programming o Win8 Store Apps, Office Task Pane app. o Unity IOC, MEF, SharePoint o GIT repo (BitBucket)
JavaScript Libraries:	Proficient in JavaScript Frameworks o **JQuery**, o **KnockoutJS**, o **Angular**, o QPromises, o **Typescripts**, o Log4JS, o OfficeJS, o JSON, o XML
RDBMS:	SQL Server 2005, 2008, 2012, MS-Access
Web Server:	IIS Server
Operating Systems:	Windows 2k [server/prof], Windows 7, Windows 8, 10

PROJECT EXPERIENCE:

Project Name:	**Conga CPQ – Large Cart Customization**
Description:	✓ Customized Large Cart CPQ for our health care client ✓ It's a completely different flow then regular cart, cart is getting created from xcal app for more than 20k records based on different locations
Roles and Responsibilities:	✓ Understanding customer requirements. ✓ Worked as a Technical Architect in this project ✓ Configured complex products, Price Matrices ✓ Customization on PCB ✓ Overall design implementation for the project ✓ Custom VF page to show progress bar of cart creation, pricing and finalize async actions and display those action into proposal

Team:	6 Members
Platform & Technologies:	**SalesForce**

Project Name:	**Conga eCommerce Customization**
Description:	✓ Customized eCommerce solution for our customer using Angular in frontend and SalesForce APIs in backend. ✓ Complete eCommerce solution, starting from product search till checkout. ✓ Created custom components, Rest APIs (SalesForce).
Roles and Responsibilities:	✓ Understanding customer requirements. ✓ Worked as an individual developer on customer's requirements. ✓ Deployment of UI App as well as SalesForce changes.
Team:	**4 Members**
Platform & Technologies:	**Angular, SalesForce**

Project Name:	**CPQ implementation for our healthcare client**
Description:	✓ Configured products and constraint rules as per customer's requirements. ✓ Setup price rule, price rule sets. ✓ Worked on split cart feature. ✓ Created triggers, VF pages, process builders, Apex Jobs.
Roles and Responsibilities:	✓ Worked as an acting TA. ✓ Involved in requirement gathering, user story setup in JIRA, code setup using VisualStudio code. ✓ Repo setup in bitbucket. ✓ Involved in development of individual modules.
Team:	**4 Members**
Platform & Technologies:	**Sales Force**

Project Name:	**CLM implementation for insurance company**
Description:	✓ Process implementation for multiple record types ✓ Custom actions on agreement ✓ Process to generate agreement name ✓ SF dynamic form to show/hide fields conditionally
Roles and Responsibilities:	✓ Built custom VF page and controller. ✓ Created custom workflows, actions and triggers. ✓ Created APIs for .net integration.
Team:	11 Members

Platform & Technologies:	Sales Force
Project Name:	**CLM migration from AIC (.Net) to SalesForce**
Description:	✓ Migration of AIC data and metadata to SalesForce. ✓ .Net EI layer integration with SalesForce (For customer's data migration). ✓ Custom API. ✓ Custom VF pages. ✓ Workflows. ✓ Triggers.
Roles and Responsibilities:	✓ Worked as a data migration lead. ✓ Built custom VF page and controller. ✓ Created custom workflows, actions and triggers. ✓ Created custom utility (in .net) to fix agreement and make it available for import offline
Team:	**11 Members**
Platform & Technologies:	**Sales Force**

Project Name:	**CPQ Customization on AIC (Apttus Intelligence Cloud)**
Description:	✓ It's all about customization of CPQ product as per customer's requirement. ✓ Developed Azure Service Fabric APIs. ✓ Developed SPA using angular.
Roles and Responsibilities:	✓ Worked as lead. ✓ **Implemented StyleCop, Code Analysis and Code Matrics to measure code quality and sharpen developer's code quality.** ✓ **Configured BitBucket (GIT) repository.** ✓ Requirement understanding & client communication. ✓ **Task estimation and distribution.** ✓ Developed reusable components which can saves lot of hours of this project and other projects over Apttus PS. ✓ Developed SPA using AngularJS. ✓ **Involved in Azure deployment activity using Jenkins.**
Team:	8 Members
Platform & Technologies:	Visual Studio 2017, C#, Azure, WebApi, Angular. Also implemented StyleCop, CodeAnalysis and ReSharper (For better code quality)

Project Name:	**Legacy Migration of Product: GeLoc32**
Client	**TUV Nord, Germany**
Description:	✓ Product GeLoc32 is being migrated from old legacy FoxPro application to latest web technology (using Microsoft ASP.Net and MVC). ✓ Product GeLoc32 allows configuration of Time, Attendance and Access control

	management system which can be consumed by some hardware (Comserver) via MS-SQL database. By GeLoc32, user can configure persons, groups, doors, time zones, holiday, Comserver, systems, Events, Log book etc. Supports Access right management and has Hardware integration. **License implementation of each module.**
Roles and Responsibilities:	✓ **Working as Technical lead.** ✓ Extremely efficient in technical roles that demand rigor, a high level of drive and dedication and a focus on delivering business outcomes through the use of standard methodologies and technologies ✓ Re-architecture the system using principle of Service-Orientation. SOA based design was made for many services. Designed Role based Authentication system as Cross-cutting concern. ✓ **Implemented StyleCop, Code Analysis and Code Matrics to measure code quality and sharpen developer's code quality.** ✓ **Configured Team Foundation Service (TFS) for maintaining user stories.** ✓ Requirement understanding for Migration of FoxPro application. ✓ **Task estimation and distribution.** ✓ Conduct internal training for team members for new technologies like MVC, Knockout and WebApis. ✓ Developed Prototype based on Knockout JS
Team:	8 Members
Platform & Technologies:	Visual Studio 2015, C#, MVC and RAZOR engine, jQuery, Knockout, jQGrid, MS-SQL Server 2012 etc. Also implemented StyleCop, CodeAnalysis and ReSharper (For better code quality)

Project Name:	**One Service Estimator (OSE)**
Client	**Microsoft, Hyderabad**
Description:	✓ This project is developed for **Microsoft**; this project is about generating **Estimations** for the opportunities comes to Microsoft. ✓ **Conversion** 100s of complex excel formulas into C# code as a processor. ✓ This application is going to be used worldwide **Microsoft's SMEs**. ✓ MVC Web as well as MS Excel TaskPane application development. ✓ Completely agile methodology. ✓ **Process excellence award for following best process and methodology.**
Role and Responsibilities:	✓ Involved in the project right from the SRS sign off stage. ✓ **Leading contribution in architectural activities.** ✓ **Successfully completed POC of TaskPane application with MVC, SignalR, Typescript and KnockoutJS at Microsoft Hyderabad.** ✓ Collaborating with business analysts, testers, developers and other team members in the overall enhancement of software product quality. ✓ **Worked as a key role for the conversion of complex excel formulas into C# code.** ✓ Involved in Test planning with development of test scenarios, functional test and execution
Team:	40 Members
Platform & Technologies:	Visual Studio 2013, Framework 4.5, C#, MVC 5.0 RAZOR, WebAPI 2.0, JQuery, Knockout. Office 2013 TaskPane App, Typescript, SignalR (for live notification).
