Seeking comprehensive growth and development within a company aimed at a continuous improvement process to provide and apply the acquired knowledge and experience in order to perform quality work.

EXPERIENCE

DECEMBER 2019 - CURRENTLY

LOCATION: MICHIGAN, UNITED STATES.

QUALITY ASSURANCE ENGINEER, NIPPON SEIKI INTERNATIONAL

- Monthly audits on all process areas to verify that the team is following the process correctly (aligned with ASPICE/ V-Cycle).
- Work with the team to close the gap in the process activities.
- Verify the quality of the work products and the maturity of the release readiness to allow the proper release of the product to the customer.
- Verify each process phase that the work products have the maturity level they need to pass to the next process phase.
- Create/update the Quality Assurance Plan.
- Create/update and implement our process and tools on projects.
- Work with the team on continuous process improvement.
- Analyze team data, objectives, performance and create reports.

JULY 2016 - NOVEMBER 2019

LOCATION: ██████████, MEXICO.

SOFTWARE QUALITY ENGINEER, CONTINENTAL AUTOMOTIVE

- Coach the team in each software release of the product and verify that the documents and code have the maturity level that we need for each phase.
- Training and coaching project teams to prepare for ASPICE assessments.
- Participate as provisional assessor in ASPICE assessments.
- In charge of coaching teams in the process implementation.
- Create and implement our process and tools on projects.
- Check that the team is using a correct review methodology and coach them to follow it.
- Implement Agile Methods.
- Analyze team objectives, performance and create chart reports.

APRIL 2014 - JULY 2016

LOCATION: ████████, MEXICO.

SCRUM MASTER, TANGOSOURCE

- In charge of implementing the agile methodologies within our projects and follow the Scrum ceremonies.
- Guides the Product Owner to better specify the requirements:
- When there are new features in the backlog, I check them to ensure

they have all the components of a story (or acceptance criteria) and I ensure that the requirements that the PO writes have what the team needs to being able to work on them.

- Help the team to solve any blockers.
- Instruct and guide the development team on their roles and oversee target deliveries on time and with quality.
- Review the final product and find solutions to overcome any issues found during the development process.
