EXPERIENCE

Senior Engineer LTTS

Mar 2021 - Present

In LTTS, I have worked on two projects.

- MapEditor
- CapeCloud

MapEditor:

- I am currently working on this project which involves Vue.js, HTML, CSS, Javascript, and ES6 as a frontend, and the backend is already completed on the Client server.
- This project has the features of an editor tool where we can edit the map using functionalities like design, image editing, and uploading option to server. Creating POI and Nodes in the Uploaded Map.

CapeCloud:

- This Product is mainly based on Carrying Goods and calculation of the weight, and height of the Goods. It has the option to create pallets, trucks, etc.
- This has been developed using the Backbone Marionette Js, HTML, CSS, and ES6 and the backend completely depends on JAVA and AWS.

Full Stack Developer Sahicareer

Apr 2020 - Mar 2021

Sahicareer:

It's a Product. where the product explains the career pathway to three categories of people job seekers and students. It gives you career counseling, provides you with an assessment, and enriches your resume. And also shows you list of colleges, schemes, skills and scholarships.

- Followed the process of Agile and was involved in PI and sprint planning.
- Understanding the requirements based on the USER Story.
- Preparing the technical specifications document.
- Mostly worked in Nodejs, ExpressJS, MongoDB

LANGUAGES

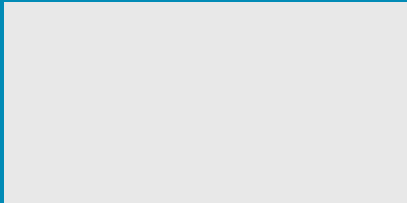

English

Tamil

AWARDS
