EXPERIENCE

Business Technology Solutions Associate Consultant ZS Associates

Jan 2018 – Present Pune, India

- Worked with leading pharmaceutical clients in developing a cloud-based solution for commercial analytics.
- Project accountability from Off-shore side on multiple work streams like ETL based on AWS services such as S3, Redshift, RDS, SnapLogic and Reporting technologies like MicroStrategy and Tableau along with Python for automations.
- Lead 4 projects with a team of 7-8 associates from both On-shore and Off-shore which includes On-boarding them in initial stages to deliver high quality solutions.

An overview of projects undertaken & Key Achievements

- Responsibilities in the project includes end to end activities like requirement gathering, design & timelines, development, business insights, reporting and analysis.
- Served as Primary ETL & front-end developer for the full lifecycle of the data warehousing project from requirement gathering to production deployment.
- Designed data models & developed ETL data flow pipelines that pulls data from mutiple sources for further storing, processing, reporting & feeding purposes.
- Developed interactive visualizations for end-users to provide them with decision making abilities and better understanding of their statistics in the current market.
- Managed daily business operations with a base of more than 1000 users.
- Provided a real time data service to the users by enabling write back functionalities to the DB using BI functionalities and Python scripts.
- Performed key automations using Python and AWS services to reduce manual efforts of 2-3 hours per day.
- As part of client acquisition of a new firm, worked on the integration part where the business units of two firms were merged together.
