WORK EXPERIENCE

DevOps Engineer Deloitte USI

07/2018 - Present

Gurgaon, India

PROJECTS DELIVERED

TUFTS

- Handling the Release Management using **Jenkins and SFDX to Production Environment**.
- Helped in proposing the new branching strategy as multiple teams were working in different environments.
- Converted the whole codebase from **MD-API to SFDX (source format)**.
- Helped in setting up the Jenkins to implement CI/CD process

State of Kentucky SSP

- Automated the process on the Azure DevOps tool by using **CD/CI pipelines**
- Revamped the version control structure to implement the new requirements
- Analyzed the risks and failures and implemented an **Encryption** policy on the codebase to make it more secure.
- Monitors the factors like **code coverage, code quality, and best practices** to avoid any unnecessary blockers and making reports to showcase it to clients

State of Kentucky Contact Tracing and Tracking

- Designed the **branching strategy** for the client.
- Guided the freshers on the basics of the deployment process and best practices.
- Automated the process on the **Azure DevOps** tool by introducing alarms and **CI/CD processes**.
- As the client wanted a weekly production release, we introduced the **Delta deployment method** as code was on top of the existing and only relevant code needed to be deployed.

Deloitte Firm Initiatives

- Helped in deployment using **CD/CI in AWS**
- Created EC2 instances and helped in configuring containers like **Docker**
- Reviewed the security groups on instances
- Have experience with **Lambda functions**
