In pursuit of challenging assignments that would facilitate the maximum utilization and application of my broad skills and expertise in making a positive difference to the organization.

Around 5 years of Experience in the IT Industry as NetSuite Technical Consultant.

PROFESSIONAL SUMMARY

- Extensive experience in translating business requirements into technical design documents by capturing workflows, technical use cases, data flow diagrams, and NetSuite configurations.
- Develop, launch, and Manage Dashboards, and reports for all team functions at both management and individual level.
- Profound experience implementing workflow solutions using NetSuite Workflow Manager (Suite Flow), Suitelets, User Event scripts, Client scripts, Scheduled scripts, and Restlet.
- Managed and delivered the enhancement requests from P2P, Order Management, FAM Management, R2R, and Accounting functional areas.
- Responsible for the entire life cycle of the project including but not limited to process mapping, project management, configuration, training, and post-go-live support.
- Conduct Business Acceptance Testing for customizations developed in-house by generating business-specific use cases, ensuring the solutions provided to clients fulfill their requirements and adhere to their internal business guidelines.
- In-depth understanding in the areas of NetSuite configuration, customization, integration, data mapping, testing, and cut-over to production.
- Develop User Guides and provide extensive training to End Users, allowing them to fully comprehend and utilize the functionality of implemented solutions.
