PROJECTS

Data Extraction from Resume — Detail

Worked on data extraction of keywords from provided documents, specially resumes. Django framework is used with MVC flow and python is used as a language. We extracted all keywords related to technology/skills that are mentioned in provided resumes. So that it becomes easy to select useful resumes and eliminate rest.

.

Covid-19 Visualizer for Employee — Detail

Contributed my work on a data visualizer project of my company. In total

SKILLS

Python

Django(beginner)

Beautiful Soup4

MongoDB

Data Structure & Algorithms

Matplotlib

C

LANGUAGES

English, Hindi

3 members worked on it. We have used Jupyter Notebook with python language for visualization of data of employees provided by the company in the form of a CSV file. CSV file consist of covid related information about employees. By visualizing data into graphs, we were able to make important analysis.

Billing Software — *Detail*

Contributed my work on development of a billing website for a customer. In total 4 members worked on it. We have used HTML, CSS, Django with MVC flow and Python to build it. Website is able to provide all fields validation, billing information, admin rights.
