PERSONAL DETAILS

Working on Microsoft .NET Technology with over 9 years and experienced in **Salesforce** Development & Administrator, APEX, Lightning Web Component (LWC), JavaScript, Sales Cloud, Service Cloud, Learning experiences on Salesforce with Trailhead:

- **Lightning Experience Customization** (Set Up my Org, Create and Customize Lightning Apps, Create and Customize List Views, Customize Record Highlights with Compact Layouts, Customize Record Details with Page Layouts, Create Custom Buttons and Links, Empower Your Users with Quick Actions)
- **Lightning App Builder** (Build a Custom Home Page for Lightning Experience, Build a Custom Record Page for Lightning Experience and the Salesforce Mobile App, Build an App Home Lightning Page, Work with Custom Lightning Components)
- **Reports & Dashboards for Lightning Experience** (Create Reports with the Report Builder, Format Reports, Visualize Your Data with the Lightning Dashboard Builder, Extend Your Reporting Strategy with AppExchange)
- **Lightning Web Components and Salesforce Data** (Use Lightning Data Service to Work with Data, Use Apex to Work with Data, Handle Server Errors)
- **Coding for Web Accessibility** (Create User Interfaces with Semantic Markup, Understand Accessible Navigation, Write Accessible Components)
- **Apex Basics & Database** (Get Started with Apex, Use sObjects, Manipulate Records with DML, Write SOQL Queries, Write SOSL Queries)
- **Apex Triggers** (Get Started with Apex Triggers, Bulk Apex Triggers)
- **Quick Start: Lightning Web Components** (Set Up Your Salesforce DX Environment, Set Up Visual Studio Code, Create a Hello World Lightning Web Component)

Overall SKILLS

Skill	Years used
Service-Cloud,Sales-Cloud,APEX,LWC	<1
C#	7+
Reactjs	1+

Nodejs	1+
AngularJS-1	2+
AngularJS-2>	1
SQL Server(Query/SP/Trigger)	5+
ASP.Net/MVC/Core	4+
ASP.Net/WebForm	6
JavaScript library/jQuery	6+
HTML, CSS,Bootstrap	6
Version Control(GIT, TFS)	5
Python Stack for Data Science	<1
Objective C/ Swift	<1

CAREER SUMMERY

Project: To-do list App

Responsible for developing and implementing the salesforce.com project. The development includes creating custom objects, LWC and Apex programming language. This project helps users to manage daily tasks, also helps to watch a week's history in list-view.

Freelancer

January 2019 – Continue

Software Developer

Project: My-Medical-Hub

This application helps The patient free identify their risks for injuring one of over 350 joints in their body with the J-Score™ process, minimizing healthcare costs and improving wellness in the process.

Accomplishment:Single-handedly designed & developed a real-time J-Score test process, Base on some automated questionnaires system capable to identify clients injury/diseases and base on interacting UI inputs and different algorithms system can measure patients risk factor.

Responsibilities:

- Designed, developed and deployed the application.
- Built scalable architecture, picked up appropriate technology in order to build a new system using Microsoft .NET Framework.
- Presented ideas for system improvements, researched on new technology.

- Worked closely with product owner, designers and staff.
 - Produced detailed specifications and writing the program codes.
 - Tested the product in controlled, real situations before going live.
- Maintained the systems once they are up and running.

Technical Tools:Dot-net 4.6, ASP.Net MVC, Web API, SQL Server 2016.

Pixelmask

May 2015 – January 2019

Software Developer

Project: NIS information migration process

Nordic insurance software also known as NIS, provide insurance solution to more than 40 countries across the globe. One of our client RSA uses NIS solution, for their business purpose they need to configure and rearrange products (insurance policy) in UAT, QA and Production environment. When a user configures product in UAT he needs to manually configure the same product in QA and Production, it's a massive and clumsy work for uses, recently NIS don't have any solution to resolve this time-consuming process. I work on this issue, by using the existing application NIS-API, we prepare a skill set to migrate UAT information in rest of the environment. On this migration, we use NIS-API and all necessary functionalities. We just rearrange functionalities in this way, it solves our problem domain requirement. For that purpose, we need to understand deeply the API and its functionality, refactor tool help us lot because we don't have API code.

Accomplishment:Prepared coding standard to avoid DRY and information expert problems. Manage existing data loss and override process.

Technical Tools:Dot-net 4.6, ASP.Net MVC, Web API, SQL Server 2016,.net Desktop,SSIS.

Project: Sherweb Sales and Marketing BI Analytics

It's a data warehouse solution that is in use as the primary data source for all Sherweb's Sales and Marketing Analytics project related reporting, data mining and analytical requirements. Application logical steps are:

- Customers provide their data in text files and upload in Azure blob storage,
- SherWeb's ETL reads data from the text files and load it in a staging database,
- Necessary validations are performed on staging area to ensure data integrity.

Accomplishment:Prepare ETLs for staging to targeted data load and maintain history, prepare necessary SSRS reports. SSIS custom logging to manage start point for Re-Runs, after failed when

application re-runs ETL packages execution start point will be the last failed executed package.

Technical Tools: MBI (SSIS, SSRS), SQL server, C#.

Responsibilities:

- Implementing business into Custom Nordic Insurance Software.
- Create custom controller, Model and Repository for projects according to business needs.
- Involvement on the Integration with various modules/application. Developed services using Restful Web API.
- Integrating payment gateway moneris.
- Connecting with Microsoft CRM through Restful service.
- Attending daily stand up meeting with project team and weekly meeting with business team, grooming session.
- Working on the combination Complete Agile methodology.
- Developing the application using ASP.NET MVC with Razor syntax, C#.NET, AJAX, J-Query, JSON, HTML 5, JavaScript, CSS.
- Implement Javascript regular modular pattern.
- Improved user experience using JQuery and used JQuery event handling mechanism to dynamically assign events on web controls.
- Used trello for defect reporting and tracking.

Cygnus Innovation LTD October

2012 – September 2014

Software Developer

Project: XERP (ISP-sales, billing and collection), Purchase

The billing process of ISP starts after receiving a Sales order from the sales department. Sales department provides a Sales order form to Billing department once any sale is generated. The sales has many features.

Accomplishment: Application used to generate client bills and help to collection.

Responsibilities:

- I am working here in all the phases of SDLC
- Built scalable architecture, picked up appropriate technology in order to build a new system using Microsoft .NET Framework.
- Tested the product in controlled, real situations before going live.
- Presented ideas for system improvements, researched on new technology. Worked closely with product owner, designers and staff.
- Produced detailed specifications and writing the program codes.

Technical Tools: ASP.Net, C#, WebAPI, JQuery, EntityFramework, SQL Server, RDLC Local Report.

Software Developer

Project: Signboard management system

There are various kinds of signboards some has backlight, some have only panaflex, this application helps the organization on signboard production and billing system management.

Accomplishment: Prepare database for organization product items maintenance information with billing and collection process.

Responsibilities:

- I am working here in all the phases of SDLC Requirement collection from client.
- Working with System Analyst to make business requirements to Software requirements.
- Technical Requirement collection from Prospective client.
- Database design from the software requirements.
- Coding, Debugging and Testing.
- Deployment the application.

EDUCATION

Southeast University, Dhaka

- BSc in Computer Science & Engineering
