

CHETAN PATIL

REACT JS DEVELOPER

+91-9021347174

chetanpatil.dev@gmail.com

Pune

PROFESSIONAL SUMMARY

- Over 4 years of experience working with front-end technologies, specializing in creating user interfaces using **React JS**.
- Technical expertise in **HTML5, CSS3, Bootstrap, JavaScript**, and **React JS**.
- Proficiency in React **Hooks, React-Router, Redux & Thunk** Middleware.
- Knowledge of **Node JS** and **Express JS**.
- Solid understanding of server-side scripting languages.
- Experience in creating **APIs** and writing schemas in **Mongoose** for **MongoDB** database connectivity.
- Proficient in using **GitHub, Visual Studio Code**, and Agile methodology (Scrum).
- Basic understanding of CICD and Docker, including manual creation of Docker images and containerization.
- Ability to work effectively in any given environment and deliver high-quality products within timelines.
- Openness to embracing new technologies, taking on challenges, and quick adaptation to new environments.

TECHNICAL SKILLS

- OS Platform - **Linux, Windows**
- Frontend Technology - **HTML, CSS, Bootstrap, JavaScript, React Js**
- Backend Technology - **Node Js, Express Js**
- Database - **MongoDB**
- Tools -**Visual Studio Code, GitHub**

EXPERTISE

- HTML & CSS
- Bootstrap
- Javascript
- React JS

FAIR SKILL

- Node JS
- Express JS
- Mongo DB
- GitHub

KNOWLEDGE

- Dockers
- Jest
- Material UI
- TypeScript

WORK EXPERIENCE

FRANKROSE WEB-SOLUTIONS (2019 - Present)

Job Position - (Software Engineer)

PROJECT DETAILS

- ♦ **PROJECT NAME : LINFOX LOGISTICS**

- ♦ **Description :** Linfox is a logistics company with more than 60 years of experience in the field, and they have managed to become one of Asia Pacific's most prominent privately-owned logistics players, gathering more than 24000 employees. They offer transportation and freight forwarding, warehousing and distribution, smart supply chains, and delivery services.

Roles and Responsibilities

- ♦ Gathering and analyzing requirements from team leads and business analysts.
- ♦ Developing user interfaces using React JS, leveraging the power of React Hooks and React Router.
- ♦ Creating responsive web designs using React Bootstrap, HTML5, and CSS3 to ensure optimal user experience across devices.
- ♦ Efficiently managing application-level state with Redux and Redux Hooks, utilizing useDispatch and useSelector for seamless data flow.
- ♦ Designing highly complex components in React, minimizing reliance on third-party NPM packages for enhanced control and customization.
- ♦ Implementing dynamic and reusable functional components to improve website performance and scalability.
- ♦ Ensuring seamless connectivity with API services by utilizing Axios or Fetch for efficient data retrieval and interaction.
- ♦ Designing and developing static or dynamic components based on the requirements specified by the product owner.
- ♦ Collaborating closely with the backend team to enhance feature validations and ensure smooth integration of frontend and backend functionalities.
- ♦ Actively utilizing Git for version control management, effectively pushing and pulling code to the GitHub repository for streamlined collaboration and code management.

- ♦ **PROJECT NAME : MENARINI GROUP**

- ♦ **Description :** The Menarini Group is an Italian pharmaceutical company. Its headquarters is in Florence, Tuscany, and it has three divisions.

Roles and Responsibilities

- ♦ Front-end development using React JS, Redux, HTML5, CSS3, and Bootstrap. Understanding and analyzing requirements from team leads.
 - ♦ Developing UI components using React JS to create interactive user interfaces.
 - ♦ Implementing unidirectional flow and managing application state using Redux.
 - ♦ Creating UI templates using HTML5 for structuring the web application.
 - ♦ Applying CSS styles using CSS3 to enhance the visual appearance of the user interface.
 - ♦ Improving web application performance through optimization techniques.
 - ♦ Utilizing Router to implement routing for seamless navigation within the application.
 - ♦ Creating different forms using React JS for capturing user input and data submission.
 - ♦ Conducting unit testing on the application using Jest to ensure code quality and functionality.
 - ♦ Testing for responsiveness of the website and promptly resolving any identified errors or issues.
 - ♦ Collaborated closely with designers and stakeholders to ensure the UI components align with the visual and functional requirements.
 - ♦ Implemented accessibility best practices to ensure the web application is inclusive and usable for users with disabilities.
-

- ♦ **PROJECT NAME : HCA HEALTHCARE**

- ♦ **Description:** HCA is the largest private healthcare provider in the world, and one of the leading private healthcare providers in the United Kingdom.

Roles and Responsibilities

- ♦ Attending daily stand-up meetings (Scrum) to gather and analysis the requirements.
- ♦ Improving and modifying the UI according to requirements.
- ♦ Responsive web design by using Bootstrap, HTML5, CSS3.
- ♦ Fixing the bugs and code optimization.
- ♦ Using Git for version control management.
- ♦ Pushing and Pulling code to GitHub repository.
