PROJECTS

SALESFORCE NON PROFIT SUCCESS PACK (NPSP) CLOUD IMPLEMENTATION.

As a Salesforce Developer, I played a key role as a team member of the development team to implement Salesforce NPSP cloud for a Non- Profit Organization. This project involved utilizing various Salesforce admin functionalities,Data Loader, Lightning Flow, Lightning Web Components (LWC), Asynchronous Apex, Apex, and Test Classes.

Responsibilities and Achievements:
- Analyzed Business requirements and designed custom object, fields,trigger,Lightning Flow to meet business needs.
- Customized Integration with third-party system using REST APIs,like integrated to Mailchimp,Strips payment service,QuickBooks,Twilio and more.
- Use NPSP cloud functionality, like Custom rollup field,Trigger Object.
- Data migration from external systems to SalesForce NPSP Data Loader.
- Manage Donations, Recurring Donations.
- Know about Matching Donations,Soft credit,Affiliation
- Implement Matching donation and Duplicate rule for avoiding creating unnecessary data.
- Schedule and Run the Batch base on weekly basis.

HR COMMUNITY PORTAL PRODUCT.

Responsibilities and Achievements:
- Collaborated with a team of developers to understand the requirements and design the HR Community Portal.
- Utilized Salesforce admin functionalities to configure and customize the portal.
- Implemented Lightning Flow to create for HR processes, streamlining employee onboarding, leave requests, and performance management.

- Developed LWC to enhance the user interface and provide a modern and responsive experience for portal users.
- Utilized Asynchronous Apex to handle processes and improve system performance, such as bulk data processing and complex calculations.
- Developed Apex classes and triggers to implement custom business logic and automate various functionalities within the portal.
- Wrote comprehensive test classes.
