## Training/internship/project

### Training on programming languages

nov 2022-apr 2023

I have undergone the training for six months. During the training period , I have learn the programming language c#, in c# I have learnt the basic concepts of c#, oops concepts and advanced concepts etc..learn frame work is asp. net and UI Technologies like html, css, java script, and data base is sql server by using sql server I learn how to create and manage the data in the form of tables. For learning this programming languages I can use the softwares like Code Blocks, SSMS, Edit Plus, Visual Studios.

## Automatic Road Reflector light Technology using IOT

In this project, we are using IOT based Automatic road reflector system Is designed to detect the light ambient on the reflector. in this project we use LDR (light dependent resistor) sensor this sensor works based on the photoconductivity. photoconductivity means dependent on the light emitting on the sensor it will light up the reflector. It is used to essentially in leading the vehicles on their path on the night time.

## SKILLS

**Programming:** C,C#

**Softwares:** Code Blocks, Visual Studio, SSMS, Edit plus

**Data Base:** SQL
