WORK EXPERIENCE

- Currently Working with Deloitte (Client), Marella Softlabs Private Limited (Company) Hyderabad from Aug 2019 to till date.

Projects Profile:

Project-1:

Name: PRM Portal

Client: Chevron

Role: Salesforce Developer

Company: Marella Softlabs Private Limited

Duration: Aug 2019 to Jun 2021

Description:

Partner relationship management software is typically cloud-based and includes content management, lead distribution, deal registration, marketing development, promotions, pricing and sales analytics. The portal will allow partners to register into the portal using partner credentials.

Responsibilities:

- ❖ Understanding the Functional and client requirements for the business.
- ❖ Worked on Profiles, Permission Sets, Data Security like OWD, Roles, Sharing Rules and Manual Sharing to maintain crucial information of an organization.
- ❖ Created Applications and Custom Objects based on requirement.
- ❖ Developed Workflow Rules, Assignment rules, Escalation rules to enable proper routing of cases to the case team members in the case management process.
- ❖ Enabled Partner Communities.
- ❖ Create Validation Rules and Assignment rules as per business logic.
- ❖ Good Experience in Business process and good knowledge of Customization in Salesforce.com, Standard Objects like Account, Contact, Opportunity, Case, Lead, Reports and Dashboards.

Project-2:

Project Name: Implementation of Patient portal

Client: Orange Coast Medical Group, USA

Role: Application Developer

Company: Marella Softlabs Private Limited

Duration: July 2021 to till date.

Description: The objective of the project is to develop a customer portal for the OCM Patients with highly responsive, rich User interface for different devices such as Smartphone's, Tablets and Desktop etc. The portal will allow patients to register into the portal. This portal will help the patients by providing information regarding their health information and allows patients to download their lab reports. Updated health records of patients will be shown graphically once patient gets access to the portal.

Responsibilities:

- ★ Understanding the Functional Specification and Business process flow.
- ★ Worked on Salesforce.com standard objects like users and Custom Objects like Patient.
- ★ Maintain and developed the Custom objects, Custom fields, Custom tabs, and Validation rules.
- ★ Created many Salesforce Lightning Web Components and Working Controllers (Server-Side and Controller side) to meet the business requirements.
- ★ Lightning Data Services and Record Forms are used to create/edit/delete the Records.
- ★ Apex classes, Apex Controllers, and Apex Triggers to develop custom business logic.
- ★ Worked on Migrating from Salesforce Classic to Lightning Experience.
- ★ Provided Security settings to access the data only authorized users only.
- ★ Experience in Flows and Process Builder.
- ★ Working on REST API.
