OBJECTIVE

Working as Software Engineer with 3.3 years of experience proficient in Golang, microservices architecture, cloud and Application Development. Strong problem-solving and collaboration skills. Ready to contribute expertise to drive success in software development projects.

EXPERIENCE

September
2023 -
Present

- Jukshio Technology - R&D Engineer
 - Hands on experience in GoLang software development with popular GoLang framework such as gin/gonic with microservices architecture and did development as per requirement.
 - Did R&D for KYC project where golang, cloud platform like AWS and messaging service like RabbitMQ used.
 - Worked on Trinity Project where Admin and Employee related API implementation done and deployed also.

E-commerce Platform

- Build project using Golang from end to end microservices architecture and create APIs to show the data regarding product all information regarding overall accuracy and daywise accuracy as per the product. Also able to see the unique products as per date and most fast moving product.

E-learning platform

- Working on Model_monitoring where Training User details are handled and build API for upload model and User Status. Also implemented individual task analysis data API to measure their performance

April
2022 -
Aug 2023

- Naviga - Software Engineer
 - Hands on experience in GoLang software development with popular GoLang framework such as gin, mux, gorm, twirp and able to work in Microservices architecture.
 - Experience in developing using GoLang and able to write unit test also.
 - Experience with Restful API development and integration using Golang with hands on exposure with Databases like MySQL, PostgreSQL
 - Experience with version control system such as Git and familiar with containerization such as docker.
 - Experienced with cloud computing platform such as AWS and services like s3, lambda, Transfer Family, Cloudwatch, Log groups, SSM

Media Project (Client Hilla and Stuff)

Tech Used: Go, AWS services (s3, lambda, Secret Manager, System Manager, cloudwatch) protobuf, Dashboard, Microservices architecture, MS-Excel

- There are 2 projects which describe about how the raw documents handle and can make a media post in specified structure where some conditions need to be fulfilled.
- Build architecture using Microservices layer where authentication and token generation for accessing API and create the project documentation on confluence.
- Implement the services for end to end read raw XML files and catch every scenario with links and tag in the modified file
- Write the method to catch the file while fail during script with proper information.
- Able to see changes in dashboard after running the files.

Dec 2021
- Mar
2022

- Advantal Technologies Pvt Ltd - Subject Matter Expert -IT Java
 - Hands on experience in core Java ,springboot servlet and developed RESTful API.
 - Hands on experience in GoLang and implemented crud operation using framework like gin,gorm and debugging the code and implemented unit testing on POC
 - Worked on java based web apps and web services
 - Worked on installation and configuration of servers
 - Experience with Database Handling and Database Management.

Logistics Project-

Worked as Middleware to build connection between SAP and RFID. Handling queries and checked that on postman using Java, springboot, Maven, AWS Management ,S3, Cloudwatch for order updates.

- Create the data chart and PPT to understand the flow of services.

Sept
2019 -
Sept
2020

- Cetpa Infotech Pvt Ltd - Software Trainee
 - Hands on exposure in Python Programming
 - Exposure to object oriented programming
 - Implement POC through python and fetch data from S3 bucket and used database
 - And familiar with frontend technologies like JavaScript, Html, CSS, Bootstrap

Worked on e-health care management project-

Tech Used: JavaScript, Html, CSS, Bootstrap, firebase, reactjs

- Build the system where doctor and patient can see the detailed information about doctor experience and patient history.
- Also able to see emergency availability and it's relevant information regarding pandemic.
- Provide the Authorization access facilities for both.

EDUCATION

2020-21

- **Post Graduation Diploma in Advance Computing**
ACTS CDAC BANGALORE
70%

2014-18

- **B.Tech**
Meerut Institute of Engineering and Technology
65%

SKILLS

Proficiency in Languages - Golang, Restful API, gRPC, Gin/gonic, gorm, core Java, springboot, maven, quarkus, Microservices

60%

DBMS- SQL MySQL,PostgresSQL

60%

Operating System - Windows, Linux

60%

Used Tools - Golang IDE, Ecilpse IDE,VSCode,Studio 3T, Postman, Mysqwork bench, IntelliJ, Virtual tool box, Apache Tomcat server, Git, Docker, Jira, Confluence, AWS

60%

Cloud Environment - AWS(S3, lambda, system manager, Cloudwatch), Azure,Docker

60%

OTHER SKILLS

- Quick learner - Open to learn and work on new technologies and products
- Ability to work in dynamic environment
- Strong analytical , Presentation, written & verbal communication skills.

ACHIEVEMENTS & AWARDS

- Golang Certification •Python Certification •Social Activities participation certificate
