ANIS MUHAMMED M

Maravattikkal(H), Parayakad P.O, Thuravoor - 688540, Kerala,
anismm8@gmail.com
+91 9020076288

SKILLS

Languages	Javascript, PHP
Frontend	HTML, CSS, Bootstrap
Framework/libraries	Express.js (Node JS), Nest JS (Node JS), Laravel (PHP), Codeigniter (PHP),Socket IO
Unit Testing	Jest, Mocha
Version Control	Github, Gitlab, Bitbucket
Databases	PostgreSQL, MySQL, MongoDB
API	RESTful APIs
Quality Assurance	SonarQube
CI/CD	Jenkins
Cloud Computing	AWS, S3 Bucket, EC2, Lambda, Cloud Watch, SQS, SNS, AutoScaling, Load Balancing
Web Servers	Apache, NGINX
Other	JSON,Agile project management tools (e.g., Jira), Microservices,OAuth, Websockets, Data Structure & Algorithm

PROFESSIONAL EXPERIENCE

- Senior Software Engineer, Cubet Technolabs, Kochi | May 2022 - Present
- Senior Software Engineer, Yuhiro Technologies, Kochi | May 2021 - May 2022
- Software Engineer, iROID Technologies, Kochi | Mar 2018 - May 2021

Key Responsibilities

- Backend Development: Extensive experience in designing and implementing backend systems using languages such as Node JS & PHP and frameworks like Express, Nest, Laravel.
- Database Management: Expertise in working with various database systems including relational (MySQL, PostgreSQL) and NoSQL databases (MongoDB).
- API Development: Proficient in creating RESTful APIs and integrating them with frontend applications to provide seamless user experiences.
- API Integrations: Integrate third-party APIs into existing applications to enable seamless data exchange and functionality, such as payment gateways and external services.

- Scalability & Performance: Demonstrated ability to optimize backend infrastructure and code to ensure high performance and scalability for large-scale applications.
- AWS Services: Leverage AWS EC2 and S3 to deploy and manage scalable applications, as well as utilize other aws services as needed to enhance the application performance and reliability.
- Websockets: Implement real-time communication and event-driven functionalities using Websockets, enabling live updates and interactive features in web applications.
- Version Control: Proficient in utilizing Git for version control, collaborating with teams, and managing code repositories efficiently.
- Security: Knowledgeable in implementing security best practices to protect backend systems and user data from potential threats.
- Problem solving: Analyze and troubleshoot complex technical issues, providing efficient and effective solutions to ensure the stability and reliability of backend systems.
- Conducted code reviews and provided feedback to ensure adherence to best practices and maintainable code.

Education

- **Bachelor of Technology (B.Tech), Information Technology**
  College of Engineering & Management Punnapra   Completed, June - 2017
  Kerala University, Alappuzha

Projects

Name	Technologies used	Description
Omang	Node JS (Nest JS), MongoDB, PostgreSQL	Learning management system
Crellective	Node JS (Express JS), MongoDB	A social media platform for creative collective peoples
RiceNGrills	Node JS (Express JS), MongoDB	Food delivery and take away application
Ajzal	Node JS (Express JS), MongoDB	Promotes a lifestyle with saving through bundles that offer exclusive deals, promotions & savings opportunities.
Almuajer	Node JS (Express JS), MongoDB	Servers real-estate property owners to request the issuance of unified tenancy electronic contract through a certified real estate broker at the Ministry of Housing in Saudi Arabia.
Jalboot	Node JS (Express JS), MongoDB	Ferry transport scheduling and tracking system. It acts as an intermediate between ferry operation team and customer. It provides boat tracking and plots the location real time on a map.
Print Ink	Node JS (Express JS), MongoDB	Application that allows users to upload images or quotes to print as in expected sizes
Eureg	Node JS (Express JS), MongoDB	Business documents scraping from websites and selling
ZettavanRental	PHP (Laravel), MySQL	Premium van rental service
Uniseca CRM	PHP (Laravel), MySQL	CRM for company Uniseca .

Qatar Online Market	PHP (Codeigniter), MySQL	Qatar Online Market is a marketplace application in Qatar where users can buy and sell their products. Qatar Online Market connects sellers with buyers to make deals for free of cost. Sellers can sell any kind of product very easily by listing it category wise. Buyers can select the category and subcategory they want and look out for the product they want to buy. Filtering option is also available where the user can search the filtered results for listing out the products more accurately.
Camus	Node JS (Express JS), MongoDB	Online drawing classes for kids
ISPAA	PHP (Codeigniter), MySQL	ISPAA is a website for International Spa Academy
Q-Solve	PHP (Codeigniter), MySQL	QSOLVE allows users to view the Solved University Question Papers (APJ Abdul Kalam Technological University) and Syllabus, both online and offline (after buying the full version). The users can also download the Solved University Question Papers and Syllabus, and view the list of Authors.
E-approval	PHP (Codeigniter), MySQL	E-Approval is a system that allows approval or rejection of Quote requests, Travel requests and Payment requests systematically with help of specifying approval paths and generates reports dynamically.
PickMyPartner	PHP (Codeigniter), MySQL	Matrimonial site to find perfect match
Fetcht	Node JS (Express JS), MongoDB	Advanced hyper local delivery company, It provides delivery services for restaurants, supermarkets, movers. through which the customers will be able to track our delivery pilots
Wise House	Node JS (Express JS), MongoDB	LMS management for a tuition center
Domain Monitor	Node JS (Express JS), MongoDB	Continuously checking added domains in the system for any breaking / errors and alert through email
MyOSchool	PHP (Codeigniter), MySQL	Learning management system to map student skills
