WORK EXPERIENCE

Cognizant - Audible (Jul 2020 – Till Date)

Audible is an Amazon company. With Audible you can stream or download your books to listen while commuting, at home, in the car, running at the gym, about to go to bed, or just about anywhere else. The requirement is to create its help center to serve their customer across the world in appropriate languages.

This project leverages extensive use of service cloud and community cloud modules.

Role and Responsibilities:

- Requirement and Solution analysis with the business analysts and Development team respectively Solution design and implement
- Involved in creation of Community pages, page variations, branding and manage audience.
- Developed re-useable lightning components and server-side controllers which we are using in Community.
- Implemented Triggers, Batch classes and Schedulable classes to meet the project requirements

Apps & Tools:

- Force.com
- Eclipse IDE
- SourceTree
- Workbench
- Atlassian Tools
- Git
- BitBucket
- JIRA
- ALM
- Ant
- NodeJS
- Data Loader

- Extensively used Salesforce out of box features to meet the Project requirements.

Cognizant - Metlife (Jan 2019-Jun 2020)

Metlife manages insurances for millions of customers. For track their insurance in Salesforce we are creating an application that helps to reps during their call with customers. Metlife complete end-to-end process implementation using Salesforce and Vlocity. Solutions involves different functionalities like, Service cloud, Communities, REST API, Developer tools, automation testing, lightning components and pages and Vlocity implementation.

Role and Responsibilities:

- Salesforce and Vlocity Developer.
- REST API Integration.
- Handshake using Javascript.
- Sprint delivery and managing customer interactions throughout the sprint.
- Managing the team size of 3, reviewing and approving the pull requests/commits.
- Building Omni script, Integration procedures, Datarapters, Vlocity cards, Templates using Vlocity.
- Followed coding standards as per SIG and Static code analysis.
- Prepared Unit Test Case and Unit Test Case logs.
- Day to day status call with customer.
- Incident analysis, bug fixes and enhancements.
- Own the deployment process for the release.

NIIT: Unilever (Jan 2018-Sep 2018)

NIIT manages training for Unilever. To track their training in salesforce, we created their system which helps them to sales rep for doing different type of activities.

Role and Responsibilities:

- Implemented Triggers, Batch classes and Schedulable classes to meet the project Requirements.
- Extensively used Salesforce out of box features to meet the project requirements.
- Successfully implemented communities and delivered with 100% customer satisfaction.
- Worked on change sets and Eclipse IDE for deployment.
- Expertise on Data migration using different tools Data loader, workbench, Import wizards.
- Analyzing the requirement and estimation of efforts required.
- Preparing knowledge sharing document.
- Mentoring new joiners in the teams.

NIIT: Rolls Royce (Apr 2017-Dec 2017)

NIIT manages training for Unilever. To track their training in salesforce, we created their system which helps them to sales rep for doing different type of activities.

Role and Responsibilities:
