Operating System	: MS-Windows, 2007, MAC, XP
SDLC Process	: Agile Scrum Process, Waterfall Process
Web Server	: Apache Tomcat all versions
Data Bases	: Oracle 11g, MySql, Ms SQL, SQL Lite, Local Storage, Session Storage
IDE & Tools	: Eclipse IDE, sublime Text, JIRA, SoapUI,Visual Studio, Notepad++
Version Control	: GIT, SVN
Debugging Tools	: Chrome developer tool, Mozilla firebug, IE developer Toolbar

---

### EDUCATION

- **Bachelor of Engineering (BE)** in Computer Technology – **CGPA (60.04)** - YCCE Nagpur - 2014.

---

## **PROFESSIONAL EXPERIENCE**

- **ParallelMinds** – April 2021 to May 2021
  - **Elite Plannings** – Oct 2018 to March 2021
  - **Pearl Logic System Pvt Ltd** – July 2016 to Sept 2018
- 

## **CAREER HIGHLIGHTS**

**Elite Plannings:** Oct 2018 to March 2021

Project: Billing, Order and CRM Data Management

**Scope:** It is product of photographic industry. It mainly designed for ERP solution for B2B and B2C application. Provides constantly updated inventory information, a database of vendors, a database of customers, a record of customer returns and refunds, information on billing and payments, order processing records, and general ledger information. Customer photos, videos, album data and preview management, delivery tracking with operation team management from 1st day to fulfil order. Application is widely used for individual customer with kart, CRM, Ordering, Care, operation, Finance modules.

My responsibilities:

- Built several web modules within an application for user Photo Data Management, Profile creation, Order Management, CRM based application. Used ReactJs, es-lint, Cloud Server, Git, ALM, JIRA and Jenkins.
- Worked on sublime Text, Backend Java Restful services, Visual studio for development. Redux Store for Application State management.
- Worked extensively on ReactJs, Bootstrap, Restful web-services, HTML 4/5, CSS 2/3, JSON, Media queries for responsiveness.
- The front end use HTML5, CSS3, ReactJS, jQuery and Bootstrap to build a single page web app that communicate with back-end via RESTful API.
- Extensively used lodash library for utilities like deep copy, filter of objects.
- Used Local Storage, session storage and Google location API.
- Built a large User-facing web application. Used extensive advanced JavaScript against a Java back end. Used JavaScript testing tools (Jasmine), linters (JSLint/JSHint), as well as many smaller Node-base utilities.
- Created an internal web application similar to HR portal.
- Implemented application testability and diagnostics and fixing bugs with the help of REDUX (Reducers) architecture.
- Extensively involved in Peer Reviews and reviewed code.
- Perform UNIT test with Protractor and Chai and web services with RESTful API.

Environments: HTML, CSS, LESS, JavaScript, ReactJS, Redux, NPM, AJAX, Bootstrap, JSON, RESTful web services, Jenkins, JIRA ,Adaptive Metadata Repository.

---

## Project: Enterprise Search

**Scope:** This project involves data integration from different sources and to produce reports. BOA provides loans to many customers and maintains accounts of huge number of customers, it also provides internet banking, SMS banking and ATM facilities to the customer, so it's very difficult for bank to maintain and integrate the records coming from different places, this cause them to implement BI system, where the data from the above all utilities are called from OLTP. The data from different source is first populated in staging database which is cleared at regular intervals and from staging the data is populated in to the DATA MART.

Analysis module is a reporting tool which is based on four oracle based tables Reports are based on Grid Components and it has facility for pagination, exporting reports, importing Reports etc. Charts are based on fusion chart technology/framework which includes charts like pie chart, series chart, multi-Series chart and stack chart.

### My responsibilities:

- Understood the business requirements according to that UI development.
- Worked with NPM commands and using Package.json for managing dependencies and dev-dependencies of node js applications.
- Manage SDLC for Service Now, including managing releases and sprints
- Developed the UI Pages in a professional manner by using web technologies like HTML5, XHTML, and CSS3 as per company standards.
- Worked extensively on , Twitter Bootstrap, RESTful web-services, HTML 4/5, CSS 2/3, JSON, Media Queries for responsiveness.
- Worked across a diverse group of people within the team and across multiple business units and multiple groups within each Business Unit.
- Develops various ideas in order to enhance UI and UX experience.
- Worked on MV\* Frameworks like Bootstrap, ReactJs.
- Worked with marketing team, in order to improve ROI and sets SEO/Web standards.
- Develops the Responsive design to make the portal compatible with Mobile/Tablets/PCs/MAC by defining media queries.
- Developing various design patterns and other functionalities include diagnostic, debugging, Troubleshooting.
- Extensively involved design discussions and user experience sessions to provide inputs on the layout.
- Developed data formatted applications and deploy the script using client side scripting using JavaScript.
- Worked on DOM manipulation using JavaScript, jQuery.

Environments: HTML, CSS , JavaScripts, ReactJs, AJAX,JSP, Bootstrap, JSON, RESTful Webpack , web services, Sublime Editor, JQUERY, Apache and Static server access, Jenkins , JIRA, NPM.
