LinkedIn : <https://www.linkedin.com/in/navatha-kannadi/>

10 years of experience in IT, played different roles as Scrum master, Business Analyst, Functional consultant, QA Engineer. Expertise in different types of testing includes functional, regression, sanity, exploratory, acceptance, compatibility etc. Experience in working with domains: Education (Dutch), Hospitality, BMS, Healthcare, Mobile banking.

I write blogs, give webinar's – whatever I do, I do it with conviction. I flourish when I have the space to work precisely, analytically, and creatively, whether it is in a team or on my own. I get motivated by observable results: a completed sprint report, a deployed release, a smile on the face of an end user. If, on top of that, I am contributing to a product or process with a social interest, I am a very happy person!

Skilled in:

- Helping teams to adapt to Agile methodologies.
- Helping Product Owner to prepare product backlog.
- Experience working as scrum master for multiple teams.
- Good experience in talking to customers, product team to gather the requirements.
- Experience in writing user stories sticking to definition of ready and answering the team questions.
- Taking refinement sessions and making the stories ready for development with poking the estimations.
- Experience in negotiating the wishes and prioritizing the requirements with customer.
- Performing different types of testing functional, regression, UAT, production, checkout testing.
- Writing automated tests using Selenium, CodeceptJS and Unit Testing (TDD) using.
- Communicating at all levels.
- Organizing the team building activities.
- Organized the Innovation days with successful ideas and value addition to product other than sprint work.
- Worked in UK, The Netherlands, USA.
