WORK EXPERIENCE

Ideavate Solutions (2019 - Current)

Software Engineer (Salesforce)

Finance Application:-
 - Worked on applications with financial background, which incorporated giving loans, and keeping a track of repayments.
 - Bulk SMS & Mails:-
Worked on dealing with sending bulk SMS/Email for repayments reminders, and other time based SMS/Email to the users in Bulk.
 - Instantaneous Payments Integration (Assembly/Stripe):-
Integrated payment platform with Salesforce. Both were instantaneous Payment solutions where payments will be disbursed as soon as the Opportunity moves to Closed Won.
 - Credit Card Payment Integration:-
This integration with payment platform helped the users to pay against their loans via the public site. A PCI Compliant Lightning Component was created for the same to take payments internally via Salesforce.
 - Acounting Firm Integration(MIN IT):-
MIN IT is a third party legacy system, which keeps a track of loan status, and payment schedules.
 - Lightning View:-
A view for the accessors were created which had data from all the childs objects and previous opportunities on a single account. The Lightning View consited of 12 components and 3 different Lightning FlexiPages for different profiles.
 - Other Related Works:-
    - Crafting PDFs
    - Crafting Bank Statements & Charts

Event Management Application:-
 - Worked on application which is used to manage the daily tasks for a event management company.
 - Here i was involved to make back to back follow up tasks + scheduled tasks simultaneously to make sure the sales rep follow the instructed sales path.
 - Rental Management System Integration(Current RMS):- Current RMS is a retal management service, the client was using CurrentRMS for Invoicing. Integrations included syncing invoice documents (PDF) + Sending Opportunity data to the system.

Work Auditing Application:-

 - This application was used to audit the amount of work completed by employees, and the amount of contribution on a particular Opportunity.

 - Aura Component:- We had to create a few aura components, which handled the audit for the Organisation for their employes. We also had a few status components which would be alloted to top management executives to monitor the activities.

- Security Settings:- We had to make the security such that the forms are visible to the users with Force.com licenses(It lacks Opportunity access)

EXTRA - CURRICULAR

- 2 Times Part of Management & photography team of College Tech Fest along with several other events.
- Got 1st Price for Presentation of Research Paper in college.
- Content Writer for several technology / Travel / Financial Websites.
- Owned & Ran a Tech Review Website for 3 Years

Laurels School International, Indore (ISC)
Percentage: 51.5%

X (Secondary), Computer Application

Year of Completion: 2013
Laurels School International, Indore (ICSE)
Percentage: 67%

PROJECTS

Day 2 Day Appliation

Minor Project   Technology: Java, Android, Angular JS

The Application was made in order to manage all the different jobs that a common person performs. Application had both the user – end and administrator – end implemented. The application was available both as a Desktop web application, and also as aMobile Application. Angular JS involved, a web app which can run in offline mode also, although this was different than the normal Desktop web application.

College Portal

Technology: Java

This application is made to bring all the Students / Faculty / Administrative department together. Here all the tasks of the college will become systematic and more faster & reliable. We also added Library management to the same system, so that the users can easily look into their fines / dues, realtime exam sheets, and many more.
