

# SWAPNA G

9000056729

Swapna.gummuluri1995@gmail.com

Having **4 years** of experience in IT and **3 year** of experience in **Manual testing** and **1 years** of experience in Performance Testing using **HP Load Runner** and **JMeter**

## Manual testing activities:

- Expertise Manual Testing and Expertise in testing Web applications.
- Experience in test case design, test case development, execution, defect tracking, and performing root cause analysis.
- Well versed with database concept and experience in using **SQL statements**.
- Well Versed with Software Development Life Cycle (**SDLC**) and Software Testing Life Cycle (**STLC**) including Agile Methodology.
- Extensively worked on Writing Test Cases, Execute Test Cases, Logging Defects, Defect Tracking and Prioritize Defects and Have used **JIRA tool**.
- Trainings provided for new joiners.
- API testing like Strong knowledge in web services testing via **Tool SOAP UI/ Restful web services**
- Worked on **Agile methodology** in sprint level
- Worked on **Swagger , SOAP UI and Post man** and Worked on **API Testing POST, GET and PUT** methods
- Good communications skills both written and verbal
- Flexible to work with different teams

## Working on PTLC and responsibilities are

- POC - Proof of Concept
- Non-Functional Requirements Gathering
- Test Plan
- Workload Modeling (Knowledge)
- Scripting & Enhancements
- Test Data (**From Oracle DB**)
- Scenario Design & Execution
- Reporting.
- Monitoring with (**Kibana ,Grafana and app dynamics**)

## Work Experience:

- Worked as Software Engineer (Manual testing) in BEYOND BLUE IT SOLUTIONS PVT LTD (**Wipro**) since 2019 to till date
- Working as Software Engineer (Performance testing) in BEYOND BLUE IT SOLUTIONS PVT LTD (**Diebold Nixdorf**) since July 2017 to 2019

## TECHNICAL SKILLS:

- Skilled in understanding Software Requirement Specification and identifying all possible Scenarios.
- Extensive knowledge in Writing Test Cases.
- Experienced in Regression Testing, Retesting, Load ,sanity ,smoke ,endurance and stress testing
- Having very good knowledge in Bug Life Cycle.
- Good Knowledge in SQL
- Defect Tool:JIRA, TDM
- Server & Client Side Testing.

## PROJECT EXPERIENCE:

### Project 1: Supply chain management

#### My Responsibilities:

- Prepared Test Plan, Test Cases and testing scenarios, Install the application and configure the application.
- Loading data into the application.
- Data preparation using SQL
- Created and Verified **Web services API requests, SOAP Protocols.**
- Involved in creating Test Environment for Web services Testing.
- Active participation in reviews and status meetings.
- Preparing the Status Reports like Daily and Weekly.
- Involved in functional specification documents to develop test cases and test scenarios.
- Finding the defects in JIRA defect tracking tool.
- Executing test cases and preparing daily execution report.
- Defect logging and tracking.
- Designed and executed quality Test Plans and Test Cases to verify Reliability, Accuracy and Compatibility of application.
- Reviewing of test cases prepared by peers.
- Sending project daily status reports.
- Providing collective status report of the team to management.
- Release Management.
- Documentation support.

## PROJECT 2:

Domains : **Web services**

Role : **Performance Tester**

- Involved in gathering the Non-functional requirements and creating the Test plan.
- Worked on SWAGGER, SOAP UI
- Prepared the script and triggered the load
- Prepared the Test report and send to the leads

### PROJECT 3 : Fortinet .ecom application

#### Responsibilities:

- Prepared Test Plan, Test Cases and testing scenarios, Install the application and configure the application.
- Loading data into the application.
- Data preparation using PL/SQL
- Executing test cases and preparing daily execution report.
- Defect logging and tracking.
- On time escalations.
- Reviewing of test cases prepared by peers.
- Providing adequate support to the developers for defect analysis.
- Prepared Traceability Matrix between test cases and requirements.

PROJECT 4 :

Name : ShopHub  
Tool : Loadrunner and Jmeter  
Role : Performance Tester

**My Responsibilities:**

- Involved in gathering the Non-functional requirements and creating the Test plan.
- Performed the Performance testing by generating scripts.
- Conducting the different types of tests against application like base line, load, stress and endurance Testing based on the requirements.
- Enhanced the test scripts and inserted different transactions, parameterization , correlation, Check points etc.
- Executing the Scenarios in Controller.
- Finding the performance bottlenecks while during the execution of load tests.
- Maintaining, Enhancing and Executing the automated test scripts using Controller.
- Performing Load testing, Stress testing and Endurance testing.
- Finding the performance bottlenecks while during the execution of load tests.
- Generate the individual test report after end of every test run.
- Generate final test report which includes client side and server side metrics.
- Interacting with developer store solve application defects.
- Providing test results summary and recommendations in the Performance Test Report.

**EDUCATIONAL QUALIFICATION:**

BTech from BVC Institute Of Technology & Science with 69% in 2016 .

I hereby declare that the above-mentioned details are true to the best of my knowledge and belief.
