

## JOB OBJECTIVE

Scaling new heights of success and leaving a mark of excellence in assignments which involve analytical capabilities and professional growth. Passionate about usability and possess working knowledge in Angular React and JavaScript.

REAS OF EXPERTISE	PROFILE SUMMARY
Front End Development	<ul style="list-style-type: none"><li>• <b>Technically Sophisticated Professional</b> with nearly 8 years of experience in the areas of Frontend Development &amp; Programming in React and Angular environment.</li><li>• Skilled in:<ul style="list-style-type: none"><li>○ Proficient in developing client code that is efficient, fast, testable, scalable, and high quality.</li><li>○ Experienced in building cross platform and highly interactive web applications using Angular, HTML5, CSS3, JavaScript, React, Bootstrap and integrating Restful API's.</li><li>○ Proficient in using React JS for creating reusable components along with sliders, charts, grids, and handling events and DOM objects.</li><li>○ Used Redux to store state of app in a singular source.</li><li>○ Customization of High charts for Angular application's analytics</li><li>○ Experience in working with Angular 2/4/7/12 modules, services, templates, AngularMaterial, directives, Filters, services, and dependency injection to create a SPA applications.</li><li>○ Hands on Experience on Angular CLI (Command line Interface), UI Development and Animations and Dynamic Component Generation.</li><li>○ Experience in investigating and fixing issues in production environments.</li><li>○ Knowledge of Software Development Life Cycle, Agile SCRUM and Test Methodologies.</li><li>○ Have been working in Agile environment consisting of Project Iterations, 2-3 weeks long Sprint Cycles, daily stand-up meetings, scrum, code reviews, sprint planning, estimation, etc.</li><li>○ Used Jenkins for build Process to Generate Continuous Integration and Version Control is done by GIT.</li><li>○ Capable of performing multi-tasking and meets deadlines by leading the team with effective decision making and communication skills.</li></ul></li></ul>
Angular & React Development	
Product Development	
Project Management	
Client Servicing	

### Functional Skills:

- Experience in handling large, complex projects autonomously, from technical design to launch.
- Adroit in providing effective resolution to customer queries related to product and improving relationships with customer by anticipating customer future requirements, thereby ensuring a positive customer experience.
- Used Jenkins for build Process to Generate Continuous Integration and Version Control is done by GIT.
- Knowledge on tools like Maven, Eclipse, Open Shift, Veracode, Jira, Visual Studio Code, Git lab.
- Work with Product Managers and Business Analysts to understand and implement complex business functionality
- Developing and re-factoring existing products, providing product enhancements and resolving product defects to meet customer issues
- Working with **onsite client** to track status & issues in offshore development mode, conducting reviews of codes & test cases and analyzing change requests/enhancements.
- Strong understanding and experienced with all the phases of SDLC and agile development methodologies including SCRUM, involved in daily SCRUM meetings to keep track of the Ongoing project status and issues using JIRA.
- Completing **product development** as per requirements, schedules & activities; contributing to team meetings, handling troubleshooting, and development problems across multiple environments.

## ORGANIZATIONAL EXPERIENCE

July 2021 – Present	FIS global, Bangalore as Lead Development Engineer
Jan 2020 – June 2021	Wipro Digital, Bangalore as Senior Software Engineer
Apr 2019 – Jan 2020	KPIT Technologies, Bangalore as Senior Software Engineer
July 2015 – Dec 2018	Kony India Private Limited, Hyderabad as Software Engineer

## IT Skills:

Frameworks:	React, NodeJS, JavaScript, Angular 2/4/6/7/8/12,
Web Development:	HTML, CSS, Java Script, React js, Angular, Bootstrap, jQuery
Application Servers:	Apache Tomcat
IDE:	MyEclipse, Eclipse, Visual Studio Code
Other Tools:	GIT, SVN, Jenkins, NPM, Open Shift, Veracode, Angular-CLI, JIRA, Bitbucket
Operating System:	Microsoft Windows 10
Debugging tools:	Chrome Developer Tools.
Methodologies:	Agile
Databases:	MySQL
Microsoft Technologies:	MS Visual Studio

## EDUCATION

2015      **B. Tech (CSE)** From Jawaharlal Nehru Technological University, Anantapur, with 79%

## PROJECTS OVERVIEW

### Hancock Whitney Bank

July 2021 – Present

#### Responsibilities:

- Have implemented the enhancements in account type changes for the customer which generated \$10 million revenue to the organization.
- Responsible for development of new modules like Page Builder, Workflow Builder, Query Builder. Enhancement and implementation of new or existing components using React js, Redux, D3 charts.
- Working for development of User Interface for the Accounts and Transfers and online Banking modules.
- Responsible for fixing and doing Veracode scans for the production issues and delivering within specified timelines.
- Coordinating with different teams for Development of Enhancements for the existing project and to support Production issues.
- Implemented various login validation features by coordinating with IDP team and Product core team.
- Developed HTML prototypes and UI deliverables, such as wireframes, flowcharts, screen mock-ups, and interface design specifications for the Enhancements within application.
- Participating and contributing towards software improvements, design inspection, code review, documentation, and take on complex bug fixes
- Fixed high priority bugs in Production within timelines and provided support services for the application.
- Work with various Testing/customer groups and improve the user experience.
- Creating new features, functionality and capabilities on the Payment and Transaction modules using Ajax, Angular, JavaScript and JSON.
- Taking an active role in structuring our single page applications to make them easy to maintain and to ensure they are highly modularized.
- Mentor junior colleagues and review the changes.
- Experience with modern testing frameworks (e.g., Jest, Cypress, Mocha, Chai)

#### Environment:

React js, Node js, Angular, Angular Material, JavaScript, HTML, CSS, Angular CLI, VS Code, eclipse, Node 8/10

### Bank Of New York Mellon

Feb 2020 – June 2021

#### Responsibilities:

- Created Typescript reusable components and services to consume REST API's using Component-based architecture provided by Angular 2.
- Extensive usage of Bootstrap for layout as well as responsive design and SASS for Responsive design.
- Experience in working with Angular 2/4 modules, services, templates, directives, services and dependency injection to create a SPA.
- Build dashboard module in pictorial representation using JavaScript(Js) plumb library which is used to track status of all the modules in application.
- Good Understanding of Document Object Model (DOM) and DOM Functions.
- Strong knowledge of JavaScript with object-oriented programming.
- Worked with UI / UX designer to help create then implement best design practices.
- Experience in writing application-level code to interact with APIs, Web Services using JSON and XML.
- Used various Angular 2 custom directives and developed reusable components and templates that can be re-used at various places in the application.
- Developed certain features of the application functionality i.e., CRUD (Create, read, update, delete) features using

ag-grid to provide Responsive Design.

- Implemented the search functionality for Internal Application using Angular.
- Leveraging responsive web frameworks to complete deliverables ahead of schedule.
- Extensively worked on Angular Material library for styling of widgets.
- Followed Agile methodology and had the Sprint calls on Daily basis and UI/UX calls 2 days in a week.
- Proficiency in building responsive and mobile optimized websites using Bootstrap.

**Environment:**

React js , Node js, Angular, Angular Material, JavaScript, HTML, CSS, Angular CLI, VS Code, eclipse, Node 8/10

**Graphical Screen Editor**

**April 2019 – Jan 2020**

**Responsibilities:**

- Designed and Developed the Editor where user can drag and drop the pictorial representation of widgets into the canvas using Angular7, Node10 and Angular CLI.
- Creating the vs code custom extension with angular project and loading the project in the WebView.
- Created Multiple widgets like widget bar, Property window, canvas as components in Angular and attached CDK DRAG functionality for the widgets in the widget bar.
- Implemented Client Server Communication using Angular as client and OTXS tool as Server using the HTTP protocol.
- Proposed and Designed the UX for the widgets, widget bar, canvas. Property window and Property Item.
- Created Re-usable components and generated the Dynamic components using JIT compiler.
- Expertise in Developing and Generating the Dynamic components and implemented services for communication between different components using Angular.
- Implemented various animations required for custom selection, orientation change, Expand, Collapse, Rotate mechanisms.
- Working on the various Angular communication mechanisms using INPUT, OUTPUT, and Service Implementations.
- Having good Knowledge on the parent-child communication utilizing references like ViewChildRef, ElementRef, TemplateRef.
- Had to work on lots of research and Analysis on the Angular Mechanisms for implementing requirements from the client.
- Responsible to Style, look and feel of the web page with SASS that extends CSS with dynamic behavior such as variable, mixing, operations and functions.
- Working on Implementing the services using the react is Observables and Subject concepts.
- For UX styling extensively worked on the Angular Material and Material Icons, did lots of analysis and POC's.
- Implemented communication between the REST service and the angular by creating a PROXY layer.
- Developed customized drag functionality for Dynamically generated components and worked on Directives in Angular.
- Binding the data from client side and performed various validations using angular.
- Worked on the unit testing with tools like jest and mocha.

**Environment:**

Angular, Angular Material, JavaScript, jQuery, HTML, CSS, GIT, MySQL, Angular CLI, VS Code, Node 8/10.

**Huntington, USA**

**Jan 2018 – Dec 2018**

**Responsibilities:**

- Extensively Worked on CSS Background, CSS Positioning, CSS Text, CSS Border, CSS Margin, CSS Sprites, CSS Padding, CSS Table, Pseudo Elements & Classes and CSS Behaviors in CSS.
- Custom screen development using Kony Visualizer.
- Configuring integration and Orchestration services in Mobile Fabric.
- Maintain existed functions that our customer wanted to modify.
- Used GIT to keep track of all changes in source code.
- Done thorough Unit Testing and handled defect fixing.
- Configuring SOAP services in Mobile fabric.
- Created web pages using HTML, CSS, jQuery and JavaScript.
- Develop UI design specs that allows and facilitate project and functional requirements across a multi-disciplinary team through all phases of the project.
- Setup agile iteration, product life cycle and had daily scrum meetings.
- Communicated with clients face to face to gather requirements, explain existing applications, provide suggestions for the expected application and demonstrated applications on each playback at client site.
- Developed web pages using HTML, Angular, JavaScript, jQuery and CSS.
- Coordinating with the team and involved in the project's analysis, design and implementation of the project.

**Environment:**

Angular, Angular Material, JavaScript, JDK, jQuery, HTML, CSS, GIT, MySQL, Angular CLI, VS Code, Node 8/10.

**QualiFacts, USA****July 2015 – Dec 2017****Responsibilities:**

- Handling Client Calls for requirements gathering and given presentations and demos to the client after developing the application.
- Part of the Demo team to perform R&D on the feasibility of Kony Product features for implementing the client requirements.
- Custom screen development using Kony Visualizer.
- Built, tested and debugged for critical modules like reports, dashboards in the system.
- Exposed various capabilities as Web Services using SOAP/WSDL and XML.
- Develop UI design specs that allows and facilitate project and functional requirements across a multi-disciplinary team through all phases of the project.
- My role would consist of translating customer requirements, formulating detailed specifications and develop user interface based on that.
- Worked with UI designers and User experience team to define screen designs. Developed angular partials based on UI screens.
- Used JavaScript to handle the basic logics and bind the Event Handlers.
- Conceptualized, designed and developed the UI that are visually pleasing and highly efficient. Provided effective and functional web designs to customers that met their specific business/personal needs.
- Supported Single Page Applications when client changed his query condition using Angular which includes Routing, Directives, and Templates.
- Used Angular \$http call to asynchronously pass JSON data between HTML page and server.
- Worked Extensively with Angular CLI for creating components, Services, pipes, Directives.
- Designed user-friendly screens using HTML and JavaScript.
- Work with NPM to set up the environment and install tools for Angular based Application.
- Defect Fixing and Perform Unit testing.

**Environment:**

Angular, Angular Material, Node 8/10, JavaScript, jQuery, HTML, CSS, GIT, MySQL, Angular CLI, VS Code, Kony Visualizer.
