**Masters in Computer Application - 66.44%**
- 2011-2014** Banasthali University, Jaipur, Rajasthan  
**Bachelors in Computer Application - 64.26%**
- 2010-2011** SVM Inter College, Muzaffarnagar (UP Board)  
**Senior Secondary Education - 71.80%**

### Experience

January 29, 2018 - present

#### Application Development Analyst (Accenture Services Pvt. Ltd., Gurugram)

- Implementation of Search Functionality in Salesforce Lightning:** This project included various configuration and customization tasks on Salesforce Lightning, development of demographic screens that included custom validations. A complete end to end "Account Search" functionality was developed that involved integration with third party systems. All types of responses were handled on the Lightning UI.
- Implementation of a requirement for a Retail Banking Client, based out of USA:** Completed a requirement that involved implementation of Streaming API along with Lightning Data Service where the user did not need to "refresh" a page in order to get the latest/updated data.
- Implementation of requirements for a Loan Provider Client based out of USA from the Financial Domain:** This project involved various administrative tasks such as setting up workflows, process builders, Lightning Flows, data model setup and other tasks like Requirement gathering, Requirement Analysis, Effort estimation. This assignment also involved integrations with third-party systems that used Integration framework for SOAP Callouts.
- Implementation of Apex frameworks for a client located in USA from Financial Sector:** Was a part of an internal team where the main focus was to develop frameworks for development in Apex and Lightning. Was responsible for the complete development and implementation of Apex Integration Framework that handled SOAP Callouts to third party systems. Other implementations included frameworks for Apex Triggers, Separation of Concerns(for DML statements) and best practices for test classes.

January 2017 - June 2017

#### Trainee - Training Information Management System

Centre for Railway Information System, ITO, New Delhi

Requirement gathering & Analysis for an internal portal. Was responsible for designing User Interface and other front-end requirements using HTML/CSS, Java. As a part of backend, Java Database Connectivity was implemented.

January 2016 - May 2016

#### Food Management App

MCA Final Project

Developed a hybrid mobile application in AngularJS, HTML/CSS. Used JSON for database connectivity. App was independent of the Platform(Android/iOS). Was responsible for development of User Interface and navigation among the screens.
