### **Pedigree Consumer Promo Application, 21 Months**

Company name -linsyssoft echnologies Pvt Ltd

Client Organisation : Pedigree India

Environment : JDK 1.6, Struts, Hibernate, MySQL, Eclipse, Tomcat.

Role: JAVA Developer

Duration - October 2016 To December 2018

Description:

Pedigree Consumer Promo is a web-based application built on top of Java, Spring & Oracle technologies. This application mainly serves the consumers to get their free samples. This application helps the puppy sellers identifying the consumers so that the business revenue can be generated in high volumes. This application contains several modules and several api integrations such as missed called API's and SMS based api's. This app also contains reports for admin with which they are able to understand the nature of the business and sale related information. It has several modules like user permissions, graphs, statistics information, user creation, call centre module etc.

### **Heineken Prize Distribution, 16 Months**

Client Organization : United Breweries Ltd (Heineken-India)

Environment : JDK 1.6, Servlets, JSP, Spring3.x, Struts1.x, Hibernate3.x, MYSql, Eclipse

Duration - March 2015 to August 2016

Description:

Heineken Prize Distribution is a Promotional event management application. As part of promotional activity,

unique codes printed in Scratch cards are distributed to the customers who bought the product. They will send the unique code through SMS which would be directly sent to the Application API which in turn processes it and allocates the prize performed by application algorithm under certain conditions set by the Client admin. This Application has 3 primary modules. Prize Distribution Algorithm, Prize distribution Controlling panel, Customer care Panel and Admin Dashboard which provides Statistics and Data information. This system has ability to decide which prize to allocate on its own by checking the availability of prizes, prize type, consumer type and location type.
